CREATING (III) YOUR LANDSCAPE

HOLM & OLSON Inc.
The Park Nurseries
SAINT PAUL, MINNESOTA

Planning Your Landscape

An attractively planted ground in any community is a force that cannot be overlooked; it has a tendency to make people desire to live in such a neighborhood, and to increase property values. The house can be made to do its part in the completed picture only when set in proper surroundings. Too often the owner forgets this when arranging the landscape, and the result is unattractive. The planting about the bungalow and the colonial house must be designed to harmonize with the architecture.

A Landscape Plan. Every landscape proposition should have a plan. The beauty of a planting depends on having the trees properly located, having in mind making the grounds look larger than they really are, with a broad, open lawn, keeping the planting around the outside borders. Another important object is the use of proper material about the foundation "to pin the house to the ground," and work out a solution for the service portion of the premises so you may have the necessary privacy.

The Cost of Planning. We make no charge for the plans where we furnish the material for the planting. It is understood, however, that where we send you the blue-prints you are charged 10 per cent of the cost of the material. If the material for the planting amounts to \$100, we charge you \$10 for the plans; if the material amounts to \$500, we charge you \$50 for the plans. This is credited to you on your order when booked. The making of the plans "free of charge" is a part of the "H. & O. Service" but we find it necessary to protect ourselves.

Cost of Material. We grow and furnish the best material that can be secured, delivered on board cars at St. Paul. We do not enter competitions either in landscape work or in the sale of the material. We offer you a "service" that is not maintained by any other firm in the West. We plan and design your grounds free of charge; furnish you with the material grown in our own nurseries; furnish you with a competent landscape gardener who superintends the planting. We guarantee satisfactory results, and will replace any trees or shrubs that foll to grow when planted by our employees

that fail to grow when planted by our employees. H. & O. Service. Write us at once for charts showing how to take measurements, giving the exact location of your house on the lot. If you need advice as to grading, walks, drives, etc., then it will be necessary to make a personal visit. Our land-scape men are on the road most of the year, and we can arrange to have them call; but when special trips are necessary we charge for the service and the expenses.

LECTURES. Civic clubs and improvement societies may arrange with us for illustrated lectures on landscape gardening and similar topics. Write us, telling the character of the meeting, and what is desired.

Notice the size of the Spireas that we can furnish. Such plants are effective from the very first

Where the Park Nurseries Are

T the eastern gate of Uncle Sam's mighty inland empire of the great Northwest stand two large cities, St. Paul and Minneapolis. These huge bee-hives of busy workers are so close together that a half-hour's brisk ride by train or motor will easily take you from one to the other. About half-way between these two landmarks of prosperity, just at the residential outskirts of Minnesota's state capital, St. Paul, are The Park Nurseries, the establishment built by the pluck and skill of Holm & Olson, Inc.

The Park Nurseries were founded primarily to furnish the residents of the Twin Cities the means to make their home grounds beautiful; and, secondly, to afford our citizens an opportunity of consulting with skilled landscape designers and plantsmen, who by reason of training and experience are able to give intelligent advice to all who are interested in ornamental plantings.

Many home-owners have taken advantage of the facilities offered, and today their grounds are pointed out as among the noted places in the Twin Cities. Aside from the personal pride involved, these home-owners are conscious of adding to the beauties of the community, and realize that well-planned grounds increase the intrinsic worth of their property.

THE PARK NURSERIES

Advantages of Planting

Many home-owners think they have an attractive home if the house is well built and the ground covered with a carpet of grass. The value of trees, shrubs, roses, and perennials is not fully understood by them, else they would never be satisfied with only a lawn to add beauty to their grounds.

To be sure the rich green lawn does add character; it is indispensable, but it is only the first step in landscape work. It really forms the basis of the design, that on which the craftsman arranges the large shrubs and trees so that the individual pieces form one harmonious whole.

First, let us consider the matter from an esthetic standpoint. This can be well explained by a homely illustration: If you were at a formal society function and saw a man without a collar and tie, you could plainly see that he was out of place. Now then, the absence of the collar and tie to the man at an evening party is just as defined as the absence of trees and shrubs from the home grounds. When the grounds are correctly arranged with the proper trees or shrubs, your landscape picture is complete. Well-laid-out grounds are more pleasing, both to you and the passerby, than grounds that are devoid of those important adjuncts.

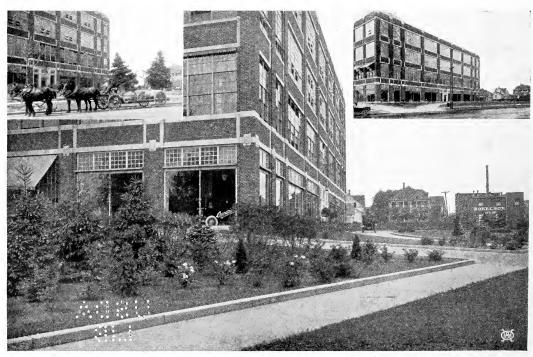

Let us consider the second reason for planting, that of increased value. Just ask yourself this question: "Would I be willing to pay more for an attractive place than for one that is bare and uninviting?" If you can answer "Yes" to this question, you have also answered "Yes" to the question "Should I plant my grounds?"

If the grounds about the house are tastefully arranged and planted, your home will have a greater monetary value should you desire to sell. When development companies start to build up a new residential section, about the first thing done is to plant the grounds. This is not done for pure love of humanity, but because they know they will obtain higher prices for the property.

The purchaser buys not the land and building alone, but the beauty added by the trees and shrubs. It may be an "unconscious influence," but it is an effect that must always be reckoned with. It is only human nature to love beauty; so why not attractive grounds above all things?

The Importance of a Plan

WHEN an artist paints a picture he does not stand his canvas on the easel and then throw on the paint. It is easy to imagine the result if he should proceed in that manner. Before painting the picture the artist goes over the canvas and sketches in crayon the design which he has planned in his mind. Not a brush touches the canvas until the sketch appears just as wanted.

This illustration shows the Overland factory before and after the H. & O. Service planned the surroundings

This picture shows the results of one year after planting by the H. & O. Service

A plan is just as important in laying out the grounds as in painting a masterpiece. Every bit of rolling ground must be considered; the location of the house, the walks and drives; whether or not absolute privacy is desired. All these must be kept in mind when preparing the landscape plan. Therefore, you will readily see the advantages of having a competent landscape-designer plan your grounds. Such a man must be familiar with all the details of home-ground arrangement as well as thoroughly conversant with the plants to be used.

Men who know these necessary points are at your command if you employ the Holm & Olson Landscape Service. This Service begins with a personal inspection and a careful survey of the grounds to be planted. A sketch of the proposed planting, together with a list of the plants to be used, is then made and submitted to you for approval. When you approve, we then proceed with the actual planting.

In selecting the individual plants we prefer to have you come to the nursery and personally select the specimens you wish. If a personal visit cannot be arranged, we use our best judgment in the selection of stock.

The trees and plants that are chosen are now carefully dug and loaded on trucks, and transferred to the place where they are to be planted, or to the express or freight station. Our plantsmen do the actual work of setting the trees or plants, as only experts can do. Everything to insure the growth of the plants is carefully done, for until you are pleased with our work we are not satisfied.

The Complete H. & O. Service

THE Holm & Olson Service is far more complete than that ordinarily found. There are many landscape-designers who will furnish you with planting plans. But you must then find a nursery which will supply the plants, get someone to move them, and still another man to attend to the planting. Result: Divided responsibility, each one blaming the other for any mistakes that occur.

This divided responsibility is eliminated when you have the complete H. & O. Service. If a mistake should occur (which we assure you is very seldom), you know that the error will be corrected at once by a responsible firm. Isn't there considerable satisfaction in this knowledge?

Nothing is done by chance; the intimate knowledge of the artisan concerning the habits of the materials used does away with uncertainty. A tall-growing tree is not used where a dwarf will be best at maturity; a deciduous shrub is never substituted for an evergreen; a late bloomer is never planted where color is demanded in spring. These are only a few of the things that may be said of the H. & O. Service. Is not such service worthy of your consideration and confidence?

A Visit to the Nurseries is Desirable

THERE is always much satisfaction in seeing a thing before you buy it, for then you get a more definite idea of what it is like. Especially so is this true when applied to trees, shrubs, and

plants—the products of a nursery. The reason is obvious. Many people send long distances for trees or plants, and, when they are set in place on the grounds, it is found that they are not at all what was wanted. This can be overcome by personal inspection at a convenient and reliable nurserv.

Come to the Park Nurseries and look at our stock as it stands in the nursery row. You will find a larger list of varieties from which to select than in any other nursery in the West. The tree or shrub is there in its natural growth, and it is easy to form a mental picture of the same tree growing on your own grounds. Ask our Superintendent, who conducts you, all the questions you wish. If you see anything you like, have him tag it for you. When the proper planting time comes, it will be properly dug and promptly removed to your place, or shipped to any point you designate.

How to Reach the Nurseries

CAR SERVICE—DIRECT TO NURSERY ENTRANCE

THE Park Nurseries are easily accessible from

St. Paul, Minneapolis, and all adjacent points. If you live outside the Twin Cities, come

any down-town point take St. Clair-Hope car, and get off at Evergreen Place, the entrance to the Park Nurseries. From points in Minneapolis. take St. Paul-Minneapolis, Como-Harriet, or Selby-Lake car, transferring at Snelling Crosstown to the St. Clair-Hope line, which brings you direct to the nursery entrance at Evergreen Place.

"The Home of Flowers"

ENTRALLY located in St. Paul, near the St. Paul Hotel, is our large cut-flower store, known the country over as "The Home of Flowers." This establishment is the largest store of its kind in America. The interior of the building is beautifully arranged and has the best equipment to be found west of New York City. Every variety of cut-flowers is on exhibition in season and we have every facility to attend promptly to

your order. More information about "The Home of Flowers," together with a large illustration of the store, is given on pages 76 and 77.

HOLM & OLSON, Inc.

to one of them by train and take a car as directed below. The Park Nurseries 20-24 WEST FIFTH STREET If motoring or driving, use Lexington Avenue, south of Summit, to St. Clair Street. From ST. PAUL, MINNESOTA

The magnificent St. Paul's Cathedral—one of the most imposing edifices in the Northwest. The H. & O. Service has just begun the planting about the grounds, and the beauty of the building will be greatly emphasized by the evergreens and sbrubs to be set around the foundation.

A distinctive arrangement of sbrubs around the home of Mr. E. N. Saunders, Jr., Summit Avenue

ORNAMENTAL TREES

E strongly urge the importance of the proper preparation of the soil before planting. The usual method practised by many planters is to dig holes much too small for the tree that took years to grow; if this is done, its life is cut off or the growth is checked. With the acknowledgement of each order we send instructions how to plant and prune and care for the trees.

Transplanted Trees. The question is often asked, "What do you mean by Transplanted Trees?" Just this: We are not what is termed a "Commercial Nursery;" we grow nursery stock from a landscape standpoint, making a specialty of ornamentals for beautifying city and country homes. We transplant our trees and shrubs into nursery rows, setting them twice and three times the usual distances apart, cutting them back to make them put on a bushy head and heavier stem, and, most important, a better root-system. Such nursery stock withstands the shock of transplanting much better than the ordinary, and responds much more quickly.

What Are Specimen Trees? Specimen trees are selections that have been transplanted from time to time, have grown into large sizes, and can be moved safely, giving quick results. Ordinarily, large trees in a nursery are "culls" left over, or unsold; but, having never been transplanted, they are of little or no value.

Niobe Willow growing in The Park Nurseries. Such trees transplant readily

Willow, Niobe (Salix Niobe). A golden barked Willow of decided weeping habit, yet not a headed tree, as its branches weep from its own stem. This is quite an acquisition to the Northwest, as all the weeping varieties are tender. Professor Hansen, of the South Dakota Experimental Station, found this variety in Northern Europe and gave it its name. The tree is a good grower, has long, pendulous branches that almost reach the ground; in winter the wood is a bright yellow, making a very effective contrast in working out color Each 10 6 to 8 ft., trans.....\$1 00 \$8 00 \$70 00

6 to 8 ft., trans...... \$1 00 \$8 00 \$70 00 8 to 10 ft., trans..... 1 50 12 00 110 00 10 to 12 ft., trans... 2 50 20 00 Specimen trees, \$5 to \$25 each.

We have some beautiful specimens, almost 10 feet across, with branches touching the ground.

We pay especial attention to baving our trees all correct as to name, and they are planted in the nursery rows sufficiently far apart for them to develop into first-class specimens. This is an important feature in growing trees.

Niobe weeping willow is a beautiful lawn tree. This specimen, 5 inches in diameter, was planted in Spring, 1916

WEEPING TREES

REES of this class are not mournful, as the expression would seem to imply, but the tendency of their growth is drooping. Trees of their habit are great acquisitions to the ornamentals. Certain characteristics about them are very striking and make them attractive; they are interesting from their oddity, and indispensable for landscape effects.

Cut-leaved Weeping Birch

Birch, Cut-leaved Weeping (Betula laciniata pendula). One of the most beautiful and desirable trees for the lawn, with delicately cut foliage. The bark is silvery white, forming a beautiful contrast with the foliage. It makes a rapid growth, and is perfectly hardy everywhere. Mr. Scott, in his "Suburban Home Grounds," says of it: "No engraving can do it justice; like the palm trees of the tropics, it must be seen in motion—swaying in the lightest breeze, its white bark glistening through the bright foliage and sparkling in the sun—to enable us to form a true impression of its character."

Each 10 100

Elm, Camperdown (*Ulmus pendula*). A remarkably picturesque weeping tree, that extends its branches horizontally until it forms a complete arbor. It does not grow over 15 feet high, while its branching head often covers 40 feet or more.

WEEPING TREES, continued

Maple, Wier's Cut-leaved Weeping (Acer dasycarpum Wierii). One of the most rapid- and graceful-growing of weeping trees, forming beautiful specimens in a short time. Its foliage is deeply cut, and is borne upon long, recurving, pendulous branches. Can be pruned severely. Each 10

Mountain Ash, Weeping (Sorbus Aucuparia pendula). The branches of this distinct variety are of a decidedly straggling pendent character, turning and twisting in every direction, each branch apparently struggling to be as different from its neighbor as possible, producing a pleasing effect. Like the other varieties of the family, the tree bears many clusters of bright red berries, which hang all winter. The pinnate foliage is distinctively beautiful.

2-yr. heads.

3-yr. heads, transplanted.

3-yr. heads, transplanted.

5-yr. heads, transplanted.

Mulberry, Teas' Weeping (Morus Tatarica pendula). We cordially recommend this as one of the thriftiest, hardiest and most beautiful of weeping trees. Grafted on a straight stem, 6 to 8 feet high, its branches sweep the ground, forming a beautiful tent of green; it forms a delightful play-house for the children. It transplants easily and is appropriate for both large and small places. The leaves are lustrous and distinctly lobed, much like the typical

 Mulberry leaf.

Young Camperdown Elms in The Park Nursery (see page 16)

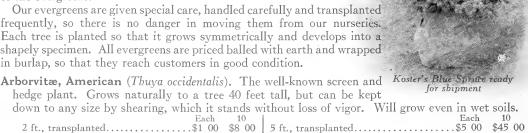

EVERGREENS

EAUTIFUL groupings can be made by carefully selecting such varieties as go well together; but one must know the habit of growth and be able to contrast the different foliage so that the real beauty will stand out. Only in recent years have we begun to discover new uses for evergreens, and no longer are these trees used only for screens or classed as fit only for cemeteries.

They furnish backgrounds for flowering shrubs; and the winter landscape is not complete without the cheerful colors of the various shades of the evergreens.

Our evergreens are given special care, handled carefully and transplanted frequently, so there is no danger in moving them from our nurseries. Each tree is planted so that it grows symmetrically and develops into a shapely specimen. All evergreens are priced balled with earth and wrapped in burlap, so that they reach customers in good condition.

hedge plant. Grows naturally to a tree 40 fee	t tall, but can be kept
down to any size by shearing, which it stands w	ithout loss of vigor. Will grow even in wet soils.

The home of Mr. A. H. Stem, Dellwood, White Bear Lake

DECIDUOUS SHRUBS

T MATTERS NOT whether planted singly or collectively, the shrub is the important factor in the adornment of any grounds. The study of the intelligent use of these by the landscape gardener, and the fact that people desire to live more away from the center of business, has caused the steady increase and the greater development in the art of planting. A certain location often suggests a particular shrub, which, by its habit of growth or color of flower, becomes a distinguishing feature of the planting. When this is the case, varieties that develop into symmetrical shape should be used. In many

locations their gracefulness and beauty are greatly admired.

When groups are formed, they can be made to bring out some feature of the lawn. If the desire is to screen some unsightly object, or to soften some strong or stiff line, such as a fence or hedge, or break the harsh and prominent feature of foundation walls, there is nothing that can

take the place of shrubs.

Along the edge of the lawn, drives or walks, plant borders of shrubs that will give flowers in succession, blooming from early spring until frost. Besides these blooming plants, there can be intermingled those of different foliage, such as purple, yellow or golden, and silvery leaves—these add and give contrast as well as character to the plantings. After the frosts have come, and the leaves have dropped, the brilliant stems and the fruits and berries that cling to the branches make them very attractive, and add much to the winter's landscape charm. The proper planting of shrubs adds both beauty and value to the grounds. A property judiciously planted is always in demand.

Nursery-row Shrubs. We are asked how they differ from other shrubs. Nursery-row shrubs are those that are planted 6 to 8 inches apart in the row when they come from the seedling or cutting bed. They have one, two and three stems, just what you get from other nurseries.

Transplanted Shrubs. These are the nursery-row plants dug and transplanted into rows, set 1½ to 2 feet apart, and cut back so they may make a bushy top and a good root-system. It takes two years additional to accomplish this, but we get a plant of more than double value. They transplant with much less loss, and give a great deal better satisfaction. Ask any of our patrons.

Specimen Shrubs. These are large, fully developed plants that give results from the time they are planted. They are moved from time to time, and can be taken up with a ball of earth the same as evergreens. We can supply these in all sizes of most varieties. They range in price from \$1.50 to \$7.50 each.

A view of the grounds in the rear of Mr. George H. Prince's residence. Garage in the background

LIGHT-GRADE SHRUBS

We have quite a demand for small shrubs, and to meet these requirements we list those that have not been transplanted. These shrubs are up to the H. & O. standard in every respect, so far as quality is concerned, the only difference being that they are not quite so large as those given in our regular list. In a season or two they will give effective results. For immediate landscape effects it is advisable to use larger plants.

When orders amount to \$25 or more, shrubs will be furnished at the ten rate, or five shrubs for half the price given for ten. Write for prices on large quantities, giving size and number of each. We have the largest collection of specimen shrubs in the country.

Almond, Double White (Amygdalus alba). The very double, rose-like, white flowers fill the branches until they bend beneath the weight of bloom.

Barberry, Thunberg's (Berberis Thunbergii). A species from Japan, with round, drooping habit, spoon-shaped leaves, of a fine brilliant green in summer, with the growing shoots always of a lighter shade, and taking on, from early autumn till December, the most glowing colors. After the leaves fall, the branches are seen to be loaded down with scarlet-crimson berries. It is the very best of all plants to form a hedge of 5 feet, being impenetrable and thickly set with spines, and never growing bare. Even in winter its closely interwoven branches and twigs are very interesting.

Sbrubs of medium beight in the foreground, with taller growers against the house, harmonize with this type of house

Dogwood, Red-twigged (Cornus Sibirica alba). Free-growing, 6 to 10 feet tall, and very hardy; forms a small, handsome tree in some situations. Its clusters of small, white flowers in early summer are very dainty, and its bark is a showy, dark red in spring. All the Siberian Dogwoods bear in early fall a profusion of whitish blue berries, making them distinctly ornamental after the

A pleasing effect secured in three years, by using a few specimen shrubs

Christ Church, one of St. Paul's landmarks, is almost hidden by the luxuriant growth of Ampelopsis Engelmanni

CLIMBING VINES AND CREEPERS

LIMBING VINES are just as necessary in the beautifying of grounds as shrubs, trees or grass; they have their important part in the planting of every place.

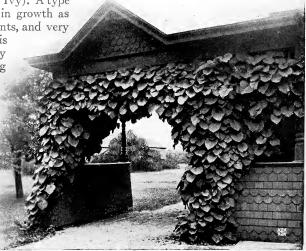

Around new buildings, they give shade quickly and are very cooling and cheerful. For verandas or trellises, there is nothing that adds more beauty than a proper selection of vines, and, by covering summer-houses, or trunks of dead trees, a strikingly wild, naturalistic effect is secured.

Vines are often used for covering stone walls, rocky banks and steep slopes, where not only are they attractive, but the fragrance from the flowers is very pleasing. Certain species of vines are adapted for clinging to brick and stone walls, and thus tone down their rough effect and soften the lines of architecture. Innumerable uses for vines will suggest themselves when improving a property. The ideas given here are practical and tried. Perhaps we can help you.

Ampelopsis Engelmanni (Engelmann's Ivy). A type of the Virginia Creeper, but different in growth as well as foliage. It has much shorter joints, and very much smaller and thicker foliage. This is the only Ampelopsis that is perfectly hardy in Minnesota, and that will cling to brick, stone or plaster. It is equipped with sufficient tendrils by which it clings to walls to hold it very close and firm. This variety is a rapid grower, has a beautiful dark green foliage, and in the fall has a beautiful autumn effect, the leaves changing to almost crimson. It is used to great advantage on churches and large buildings of all kinds, to break the hard stone and brick

effects. Each 10

Combining beauty and utility—the pergola supports a number of Beta Grapevines

The largest assortment of specimen trees, sbrubs and vines to be bad in the country. Note from the illustrations bow they are grown. Each a specimen representing "H. & O. Quality." These are admirably adapted to producing immediate effects about the bome, and will at once convert an otherwise barren spot into a place of beauty, without waiting for the slow processes

of nature.

Thunberg's Barberry makes a splendid low bedge for the street line. It grows quite dense, and offers considerable resistance to intruders. The red berries in winter are pleasing and attractive

DECIDUOUS HEDGES

HERE is nothing quite so effective for the boundaries of a lawn or property division as a hedge. It does not decay, nor does it require paint, but grows more beautiful and effective each year. The first cost of installing a hedge is its only cost, so that, from an economical standpoint, it is less expensive than a fence.

When a hedge is desired for screening, high-growing varieties should be used that do not require trimming; but when it is to act as a border or division, use shrubs of low, dense-growing habit.

We recommend Buckthorn as being the best for the Northwest, with compact, dense growth and dark green foliage. Where a formal effect is wanted, this can be trimmed in any manner desired—rounded or flat on top, with square sides. It is very hardy, withstanding our severe winters.

When a low hedge is wanted, we recommend Thunberg's Barberry—this is one of the most attractive and ornamental hedges there is. It is much admired for its beautiful foliage, compact growth, and red berries in the fall.

For fuller descriptions, see under Deciduous Shrubs.

Barberry, Green (Berberis vulgaris). Flowers yellow; berries dark red. Grows upright, 5 to 8 feet high, with light green foliage.

HARDY PERENNIALS

HE RETURN to popular favor of the old-fashioned flowers infuses into our gardens a peculiar charm, rare beauty and fragrance, that is possible only with hardy perennials. Each day, from the time the tree-buds first burst in the spring until the leaves are gone, the hardy perennial garden is of constant interest and delight. All the old favorites are found here, with the new hybrids and selections.

Ideas differ widely among experts as to the best methods of care and arrangement of the hardy garden or border. Much depends upon the location and size of the grounds at one's disposal, while the owner's individual taste must be carefully considered.

Situation.—The most effective location is a good, open border, backed by a hedge, fence, trellis or building. Some of the taller-growing kinds are used as a background; then other sorts of shorter growth, graduating down to the grass line. Perennials are frequently planted among, or in front of shrubs, giving bloom when many of the shrubs are through flowering and supplying a background for the perennial blossoms.

Soil and Planting.—Good cultivation and good soil are the secret of a beautiful garden. Each season the soil should be mulched with well-rotted manure, and, in the spring, spade this into the soil. Bone meal can be used, but we prefer the former as a fertilizer, as it leaves the soil looser, besides adding humus.

Excepting a few woody and robust perennials, the best time to plant in the Northwest is in the spring.

Do not make the common mistake of crowding the plants. Those that grow

2 feet in height should not be set closer than 12 inches, but those that grow 3 feet should be planted 18 inches apart.

We grow Hardy Perennial Plants by the million in our nursery

A perennial border that gives color during the entire summer

Note.—We grow the very finest perennials, and agree to deliver in good condition, but they are sold with the understanding that, should any fail to grow, it is the purchaser's loss. Owing to the low price at which they are sold, we do not guarantee them to grow.

A. Millefolium (Rosy Milfoil). Blooms all summer. Has a rosy red flower on stems from 12 to 18 inches. The foliage is deeply cut and ornamental. Used in wild gardens; also with shrubbery. 20 cts.; strong, 30 cts.

Achillea Ptarmica, "The Pearl" (White Milfoil). Blooms in July and August. Height, ? feet; flowers small, but the plant is covered with a mass of white bloom; used for gardens and shrubbery.

20 cts.; strong, 30 cts.

A. tomentosa (Woolly Yarrow). Handsome, cut foliage and bright vellow flowers in a multitude of flat heads during June. Height about 12 inches. 20 cts.; strong, 30 cts.

The vigor and strength of our Hardy Perennial Plants are most remarkable

Aconitum Storkianum (Monkshood, or Helmet Flower). Beautiful, rich, deep blue flowers in large spikes. July and August. 30 cts.; strong, 35 cts.

Agrostemma (Rose Campion). Stout, erect-growing plants, with silvery foliage, which contrasts well with the showy flowers, which are produced during June and July. 20 cts.; strong, 30 cts.

Ægopodium Podograria variegatum (Bishop's Weed). A rapidgrowing plant, with neat green-and-yellow variegated foliage, thriving in any soil; makes a fine border for a bed of shrubs or for covering waste ground; 1 foot. 20 cts.; strong, 30 cts.

Alyssum saxatile compactum (Golden Tuft, or Basket of Gold). Season of blooming, May and June. Height, 8 to 10 inches. Golden yellow. An excellent low-spreading plant for rockery or border. 20 cts.; strong, 30 cts.

Japanese Anemone in mass planting

Anemone, Queen Charlotte. Very large semi-double flowers of La France pink, a color that is rare among hardy plants. 25 cts.; strong, 35 cts.

A., Whirlwind (Wind Flower). Season of blooming, August to November. Height, 2 to 3 feet. Flowers 2 to 3 inches across, very double, with several rows of petals. Creamy white. Plant needs cool, moist location. Can be planted in clumps or solid beds. 20 cts.; strong, 30 cts.

Anchusa Italica, Dropmore Variety (Sea Bugloss). A grand improvement on the old Italian Alkanet; grows 5 feet high and produces its pretty gentian-blue flowers throughout the entire summer; one of the best blue perennials. 30 cts.; strong, 40 cts.

A., Opal. Similar to the above, but lustrous, light blue in color. 30 cts.

Anthemis tinctoria Kelwayi (Hardy Marguerite). Blooms all summer. Height, 18 to 24 inches. Gives a continuous showing, throughout the season, of daisy-like flowers. Color of bloom golden yellow. 20 cts.; strong, 30 cts.

Aquilegia Canadensis (Columbine). Blooms from June to August. Height, 2 feet. Flowers red and yellow, held gracefully on long stems. A strong grower and free bloomer. An old favorite, and does well in almost any location. 20 cts.; strong, 30 cts.

A. chrysantha (Golden-spurred Columbine). Blooms from June to August. Height, 3 feet. Color golden yellow. Desirable to plant in partially shady places, or in borders. 20 cts.; strong, 30 cts.

A. cærulea (Rocky Mountain Columbine). Blooms from May to July. Height, 12 to 18 inches. Color pure blue. 20 cts.; strong, 30 cts.

A. Californica hybrida. Long-spurred flowers in a variety of coloring such as yellow, pink, flesh, red, etc. These are very attractive and more beautiful than the standard types. 30 cts.; strong, 40 cts.

Arabis alpina (Rock Cress). Blooms from April to May. Height, 6 inches. A very low-spreading plant, completely covered with pure white flowers. Used for borders or around walls or for rockery. Fine for massing. 20 cts.; strong, 30 cts.

Armeria formosa (Sea Pink). A fine variety, with deep crimson flowers, blooming through the summer. Fine for cutting purposes. 20 cts.; strong, 30 cts.

A. Laucheana rosea. Bright rose. 20 cts.; strong, 30 cts.

Artemisia lactiflora. Unlike the other varieties, it is a most effective flowering plant. Stems 3 to 4 feet. Clothed with elegantly cut green foliage. The flower is hawthorn-scented, creamy white, spirea-like, light, and graceful. August to September. 25 cts.; strong, 35 cts.

Asclepias tuberosa (Butterfly Weed). Compact umbels of brilliant orange-colored flowers. 20 cts.; strong, 30 cts.

Aster, Hardy (Michaelmas Daisy, or Starwort). We offer a good selection in many colors. Asters are good for background planting, and bloom late. 20 cts.; strong, 30 cts.

A. Curtisii. Pale heliotrope; August and September. Height, 3 feet. 20

cts.; strong, 30 cts.

A., Hon. E. Gibbs. Pale lavender.
August. Height, 3 feet. 20 cts.; strong, 30 cts.

A., Lorenz. Lavender-blue. Very

early. Height, 2 feet. 25 cts.; strong, 35 cts.

A., Mrs. F. W. Raynor. Large, rich crimson-purple flowers. Height, 4 feet. 20 cts.; strong, 30 cts.

A. Novæ-Angliæ (New England Aster). Blooms late in summer. Height, 3 feet. Color violet-purple. 20 cts.;

The Columbine's quaint flowers

Campanula (see page 51) strong, 30 cts.

The charm of a hardy border is greatly increased when suitable plants are chosen. The stately spikerise like cathedral towers among the low-growing Daisies, Dianthus, and Pansies The stately spikes of the Digitalis

Aster, Peggy Ballard. Small, semi-double, lavender-blue. Height, 4 feet. 25 cts.; strong, 35 cts. A., Perry's Pink. Large branched heads; reddish

pink flowers. September to October. Height, 31/2 feet. 20 cts.; strong, 30 cts.

A., Robert Parker. Light blue. September. Height, 3 feet. 20 cts.; strong, 30 cts. A., Saphir. Soft sky-blue. Height, 3 feet. 20 cts.;

strong, 30 cts.

A., Snowflake. Very free; pure white. Height, 18 inches. 20 cts.; strong, 30 cts.

A., White Queen. Fine, pure white. Height, 4 feet. 20 cts.; strong, 30 cts.

Astilbe, Gruno Hybrida. A splendid salmon-pink sort, growing 4 feet. Graceful spreading spikes of flowers, the finest pink yet introduced. 50 cts.; strong, 60 cts.

A., Moerheimii Hybrida. A well-branched, erect spike of flowers, having a length of 2 feet and are of a beautiful creamy white. The Royal Horticultural Society of Holland considers this the most important hardy perennial introduced in many

years. 50 cts.; strong, 75 cts. A., Salland Hybrida. Same nature as the others except the color of flower is a distinct red, differing from all others. 50 cts.; strong, 60 cts.

Baptisia australis (False Indigo). Blooms June and July. Height 2 to 3 feet. Color dark blue. 20 cts.; strong, 30 cts.

Bleeding-Heart. See Dielytra.

Bocconia cordata (Plume Poppy). Blooms July and August. Height, 6 to 7 feet. Flowers creamy white. Fine for background. 20 cts.; strong, 30 cts.

Boltonia asteroides (False Chamomile). Blooms July to October. Height, 4 feet. Color white. A strong plant that is covered during the summer and autumn with hundreds of small white flowers. 20 cts.; strong, 30 cts.

Boltonia latisquama. The same as above, except that the flower is a pale pink. 20 cts.; strong, 30c.

Campanula Carpatica (Bellflower, or Harebell). Blooms July to August. Height, 18 inches. Color blue. Of dwarf habit, especially used for borders of beds or for edging; also for rockery. Its deep blue flowers are very attractive and almost always in bloom. 20 cts.; strong, 30 cts.

C. Carpatica alba. Same description as above, except flower is white. 20 cts.; strong, 30 cts.

C. calycanthema (Cup-and-Saucer; Canterbury Bell). Blooms July and August. Height, 2 feet. Colors mixed—blue, rose and white. 20 cts.; strong, 30 cts.

C. glomerata (Clustered Bellflower). Blooms all summer. Height, 18 inches. Color violet-blue. Profuse bloomer, and its bell-shaped flowers are always attractive. 20 cts.; strong, 30 cts.

C. Medium (Canterbury Bells). These come in

blue, rose, white, and choice mixed colors. Height, 3 feet. 25 cts.; strong, 35 cts.

C. persicifolia (Peach Bells). Blue and white flowers during June and July. Height, 2 feet. 25 cts.; strong, 35 cts.

C. pyramidalis (Chimney Bellflower). Flowers in August. The most conspicuous of all the Campanulas, forming a perfect pyramid. Height, 4 to 5 feet. 25 cts.; strong, 35 cts.

Centaurea montana (Perennial Cornflower). Grows 2 feet high, bearing large, violet-blue flowers from July to September. 20c.; strong, 30c.

Chrysanthemum Leucanthemum fl.-pl. A double-flowering Daisy of this type has long been sought and is now offered. The white flowers, about 2½ inches in diameter, are not unlike a double white pyrethrum. Plants grow about 15 inches high and produce masses of bloom in June and July. Scattered flowers during the rest of the summer and fall. 50 cts.

Brilliant Hardy Pinks (see page 54)

Chrysanthemum maximum (Moonpenny Daisy). Blooms July to October. Height, 3 feet. Color white. 20 cts.; strong, 30 cts.

C. hybridum (Shasta Daisy). Blooms all summer. Height 12 to 15 inches. Color white. 20 cts.; strong, 30 cts.

C. hybridum, Alaska. Blooms all summer. Height, 12 to 15 inches. Color white. A great improvement over Shasta Daisy, being much larger, 4½ to 5 inches in diameter. Very free bloomer and much hardier than its parent. 25 cts.; strong, 35 cts.

Clematis, Shrubby. This type of Clematis is deserving of the greatest popularity.

C. Davidiana. A most desirable variety, with fresh, bright green foliage and tubular, bell-shaped flowers of deep lavender-blue during August and September; deliciously fragrant. 25 cts.;

strong, 35 cts. C. recta. Another fine variety, with hardsome, pure white flowers. 25 cts.; strong, 35 cts.

Coreopsis grandiflora. One of the most popular hardy plants. The flowers are a rich golden yellow, of graceful form and invaluable for cutting; the main crop comes during the latter part of June, but it continues in bloom the entire summer and autumn. It succeeds everywhere. 20 cts.; strong, 30 cts.

C. lanceolata (Tickseed). Blooms April to May. Height, 2 feet. Color deep golden yellow. 20 cts.; strong, 30 cts.

Coreopsis rosea. Blooms June to September. Height, 12 inches. Color pink. A low-growing plant, used for borders of beds or clumps, or for rock-gardens. 20 cts.; strong, 30 cts.

C. verticillata. Masses of small golden yellow flowers in July and August, on neat plants, with divided foliage. 20 cts.; strong, 30 cts.

Delphinium Chinense (Larkspur). Blooms June to August. Height, 3 feet; color light blue. A low-growing variety, with pretty, fern-like foliage, and producing beautiful, deep blue flowers, which are very striking and attractive. Used largely for background. 20 cts.; strong, 30 cts. D. Chinense album. Similar to the above except that the bloom is white, and is very effective in

20 cts.; strong, 30 cts. D., Belladonna. The freest and most contin-uous blooming of all, never being out of flower from the end of June until cut down by hard frost. The clear turquoiseblue of its flowers is not equaled

other flower. 30 cts.; strong, 40c. D. formosum. Blooms July to September. Height, 4 feet. Color deep blue, with white eye. This variety is unsurpassed. 25 cts.; strong, 35 cts.

for delicacy and beauty by any

D. Moerheimei. The first really white hybrid Delphinium introduced and a decided acquisition. Plants strong and vigorous. 5 feet high. The flowers are purest white with the slightest shading.

Blooms from June until frost. 50 cts.; strong, 60 cts.

D., Siberian Hybrids. These are the finest strain of mixed hybrids ever offered. Our original stock came from Siberia, and is of the hardiest type. Plants strong and vigorous, with large flowers; spikes vary from 18 to 24 inches in length, the flowers running to lighter shades of blue. 25 cts.; strong, 35 cts.

Dielytra spectabilis (Bleeding-Heart). Blooms May to June. Height, 2 feet. Flowers pink and white; heart-shaped. 25 cts.; strong, 35 cts. Blooms May to June.

Shasta Daisies shine out effectively in the hardy border

Digitalis purpurea (Foxglove). Blooms July to August. Height. 4 feet. Colors, mixed. This old favorite is very well known and very popular. It gives abundance of bloom and is suited for background in plantings. 20 cts.; strong, 30 cts.

D. gloxinæflora (Gloxinia-flowered Foxglove). A beautiful strain of finely spotted varieties. We offer them in White, Purple, Lilac, Rose or Mixed. 20 cts; strong, 30 cts.

Dianthus barbatus (Sweet William). Blooms May to July. Height, 12 to 18 inches. Colors in assortment. Sweet Williams were usually one of the features in the gardens of our grandmothers and they continue just as popular today. 20 cts.; strong, 30 cts.

D. deltoides roseus (Hardy Pink). Blooms all season. Height, 8 to 12 inches. Light red. These old-time favorites need no description; they bloom all season and are very fragrant. Used for edging beds or in rockeries or wherever a low plant is needed. 20 cts.; strong, 30 cts.

D. deltoides albus. Blooms all season. Height, 8 to 12 inches. Color white. 20 cts.; strong, 30 cts.

D. latifolius (Hybrid Sweet William). Blooms all summer. Height, 15 inches. Color brilliant crimson. A beautiful summer bedding variety, producing masses of brilliant fiery crimson flowers throughout the entire season. 25 cts.; strong, 35 cts.

Gaillardia grandiflora (see page 54)

D. plumarius (Scotch Pink). Blooms all season. Height, 8 to 12 inches. Colors mixed. Otherwise same as above. 20 cts.; strong, 30 cts.

D. semperflorens (Everblooming Pink). Height, 8 to 12 inches. Colors mixed. 20 cts.; strong, 30 cts. Dracocephalum Virginianum album (Dragon's Head). Terminal clusters of showy, pentstemonlike flowers. A cool situation is favorable to their growth. 2 feet. June and July.

Pure white. 25 cts.; strong, 35 cts. Erigeron Coulteri (Fleabane). Flowers white, with

Veronica and Phlox make a charming combination of colors (see pages 57 and 62)

golden centers. July. Height, 15 inches. 20 cts.; strong, 30 cts. Eupatorium Fraseri. Strong-growing border

plants, suitable for cutting; they bear minute white flowers in dense heads. Ordinary garden soil suits them. 20 cts.; strong, 30c. Ferns, Hardy. All of these are attractive, and the majority succeed best when planted on rockwork in a shady situation,

or about the foundation of a house, or in a corner shaded from the sun and sheltered from strong winds. Many suitable positions for Hardy Ferns may be found in gardens where their culture is not now attempted. They should have a good depth of soil and plenty of water in summer. Ferns should be massed together, giving them sufficient space to develop; they do better when planted in this manner and are more effective from the massing. We offer

> sorts, and used either singly or collectively they are very attractive. It is wise for you to write us, telling just how they are to be used, and we can then advise. 25 cts. each, \$2.50 per doz., \$15 per 100.

a good collection of the native

Funkia cærulea (Plantain Lily). Blooms July and August. Height, 12 inches. Color blue. Attractive, dark green, glossy foliage, with numerous tall stems, clothed with blue lily-like flowers. Attractive and decorative at all times, its drooping and overlapping leaves make it very ornamental. 20 cts.; strong, 30 cts.

HARDY PERENNIALS, continued

Funkia undulata variegata (Variegated Day Lily). Blooms July and August. Height, 12 inches. Broad, waxy foliage, conspicuously and beautifully variegated with pure white. Used for foliage effect and for edging to beds of high plants. 20 cts.; strong, 30 cts.

F. subcordata grandiflora (White Day Lily). Blooms August and September. Height, 18 inches. Color pure white. Exquisite flowers, large, long and trumpet-shaped, with delicious fragrance. Its glossy foliage of bright light green makes it effective and attractive when grouped in masses or when set in groups of itself. 25 cts.; strong, 35 cts.

Gaillardia grandiflora (Blanket Flower). Blooms June Heliopsis Pitcheriana

Iceland Poppy (see p. 56)

to October. Height, 2 to 3 feet; colors orange, red, brown and crimson. We offer no more desirable perennial plant than this. It blooms the entire summer, and is at home in all locations. Its flower is a bright golden yellow and rich reddish brown, going into all imaginable tints and shades. 20 cts.;

strong, 30 cts. Golden Glow. See Rudbeckia.

Gypsophila paniculata (Baby's Breath). Blooms August to September. Height, 3 feet. Color white. A favorite, delicately formed plant, that produces a profusion of tiny white flowers during the latter part of the summer. 20 cts.; strong, 30 cts.

G. paniculata fl.-pl. The pretty, little, double, rosette-like flowers of this new variety, which are produced in much-branched panicles, are valuable for cutting and a most desirable addition to the hardy border. 30 cts.; strong, 50 cts.

G. rosea. A charming pink variety of Baby's Breath, with the same fairy-like grace of the white sort. 25 cts.; strong, 35 cts.

Hardy Pinks. See Dianthus.

Helenium (Sneezewort). All of these are desirable border plants, succeeding in any soil in a sunny location, with broad-spreading heads of flowers.

H. autumnale superbum. Golden yellow flowers during the late summer and fall months. Height, 5 to 6 feet. 20 cts.; strong, 30 cts.

H. pumilum magnificum. A most useful perennial, about 18 inches high, and smothered with its

golden yellow blossoms all summer. 20 cts.; strong, 30 cts. Helianthus giganteus (Hardy Sunflower). A native variety, with medium-sized, bright canary-yellow flowers in September and October. Brightens the garden when colors are scarce, and the flowers are extra fine for home decoration. Height, 6 feet. 20 cts.; strong, 30 cts.

H., Meteor. Large, double, orange-yellow flowers, with bold yellow guard petals; August and Septem-

ber. Height, 5 feet. 20 cts.; strong, 30 cts.

H. multiflorus fl.-pl. (Double Hardy Sunflower). Large, double, dahlia-like, golden yellow flowers in great profusion during July and August. Especially fine for cutting, as they keep fresh a long time. Height, 4 feet. 20 cts.; strong, 30 cts.

H. orgyalis. A tall variety, 6 feet high, with curious long, narrow foliage and bearing great clusters of medium-sized, single, golden yellow flowers during September. Should always be planted in the back row of the border, and it is advisable to give the long stems some support. 20 cts.; strong, 30 cts.

H., Soleil d'Or. Deep golden yellow, quilled petals, not unlike a dahlia. One of the finest of all Sunflowers to use for cutting, lasting a long time in water. Height, 4 feet. August and September. 20 cts.; strong, 30 cts.

Heliopsis Pitcheriana (Orange Sunflower). Blooms June to September. Height, 3 feet. Color orange. A continual bloomer from early summer until late in the season. The flowers are carried on long stems and are fine for cutting. Gives color to clumps of shrubbery or to perennial gardens. 20 cts.; strong, 30 cts.

H., Miss Mellish. September and October. Grows about 6 feet high; large, single, golden yellow flowers, fine for cutting. 20 cts.; strong, 30 cts.

H. zinniæflora. A new double-flowering form growing only 24 inches high and producing, in July and August, golden yellow flowers closely resembling a zinnia in form. Desirable for cutting. 25 cts.; strong, 35 cts.

Hemerocallis aurantiaca. One of the finest flowers whose color throughout June and July is a rich Indian yellow. Height, 2 to 3 feet. 25c.; strong, 35c.

H. flava (Lemon Day Lily). Blooms during August and September. Height, 3 feet. Color yellow. A profusion of large, yellow lilies during the latter part of the summer gives color to clumps of shrubbery. 20 cts.; strong, 30 cts.

H. fulva (Tawny Day Lily). Grows 4 to 5 feet high, with trumpet-shaped flowers. Natural orange color. 20 cts.; strong, 30 cts.

H. Middendorfii. The earliest; flowers bell-shaped, rich chrome-yellow. Height, 2 feet. Hardy and free-blooming. Early May. 20c.; strong, 30c.

Chrysanthemum maximum (see page 51)

SAINT PAUL, MINN.

HARDY PERENNIALS, continued

Hemerocallis Thunbergii. The latest to flower; rich buttercupyellow, funnel-shaped flowers throughout July. Height, 4 feet. 20 cts.; strong, 30 cts.

Heuchera sanguinea. Most desirable dwarf, compact, bushy plants. Excellent for border or rockery; bright coralred. 25c.; strong, 35c.

Delphiniums (see page 52)
October. Height, 4 feet. Color pure white, crimson center. In September it bears large flowers

with crimson centers. 20 cts.; strong, 30 cts. **H. Moscheutos** (Swamp Rose Mallow). Blooms September and October. Height, 5 feet. Color pink. 20 cts.; strong, 30 cts.

H., Mallow Marvels. A robust type of upright habit; flowers of enormous size; rich shades of crimson, pink, and white. 25 cts.; strong, 35 cts.

Hollyhocks, Double (Althea). Blooms June to August. Height, 4 to 5 feet. Colors mixed. Hollyhocks are undoubtedly among the most ornamental and handsome garden flowers, with their tall spikes dotted with large, double flowers of the most lovely shades of color. 25 cts.; strong, 30 cts.

H., Allegheny. Mammoth flowers, wonderfully formed of loosely arranged, fringed petals, which look as if made from the finest China silk. 25 cts.; strong, 30 cts.

H., Single. Many perfer the single-flowering Hollyhocks. They are usually of freer growth than the doubles. Choicest mixed varieties in all colors. 25 cts.; strong, 30 cts.

Incarvillea Delavayi (Hardy Gloxinia). One of the choicest perennial plants introduced in recent years. It produces large, gloxinia-like, rose-colored flowers, which last in perfection a long time; these are produced in clusters on stems 18 inches high; succeeds in sun or shade, but should be protected with a covering of leaves during the winter. 20 cts.; strong, 30 cts.

Iris. See page 61.

Lilium auratum (Gold-banded Lily). Blooms in July. Height, 3 feet. Color ivory-white, thickly marked with reddish chocolate dots. Immense, bell-shaped flowers borne in clusters on long, stiff stalks. The most beautiful and popular variety of all the Lily family and should be in every garden. 25 cts.; strong, 35 cts.; potted, 50 cts.

L. elegans (Orange Lily). Of dwarf habit; very hardy and produces large, showy flowers in great numbers. They range in color from orange to dark red, some being apricot-yellow, all being beautifully dotted more or less with dark brown. A splendid sort for planting in masses. 25 cts.; strong, 35 cts.

L. speciosum album (Japanese Lily). Pure white, with beautiful recurved petals; very fragrant. Bulbs are hardy and with only slight protection will survive severe winters. 25 cts.; strong, 35 cts.; potted, 50 cts.

Lilium speciosum rubrum (Crimson-banded Lily). Once planted in a favorable location will last for years. Flowers are white, with a deep rosy crimson band on each petal; 5 to 6 inches in diameter; are very fragrant. Bulbs hardy. 25 cts.; strong, 35 cts.; potted, 50 cts.

L. tigrinum flore-pleno (Double Tiger Lily). A double form of the well-known Tiger Lily; grows from 4 to 5 feet high, and produces a large number of bright orange flowers. 25 cts.; strong,

35 cts.; potted, 50 cts.

Lily-of-the-Valley (Convallaria majalis). Blooms May. Height, 6 to 10 inches. Heavy dark green foliage, with small, bell-shaped, pure white flowers in pretty racemes, graceful and extremely fragrant. Requires rich, moist soil. Succeeds best in partial shade. 20 cts.; strong, 30 cts.

Linum perenne (Flax). Blooms all summer. Height, 18 inches. Color blue. Graceful foliage, large blue flowers. Splendid for colony planting and with shrubbery. 20 cts.; strong, 30 cts.

Lupinus polyphyllus (Lupine). These plants bloom from about the 20th of May for three weeks, and grow about 3 feet high, with handsome blue flowers. Perfectly hardy and free from attacks of insects. Require only well-prepared soil and to be kept watered. 20 cts.; strong, 30 cts.

Perennials and shrubbery make a charming combination

There is something impressive about a stately row of Hollybocks (see page 55)

Lychnis Chalcedonica (London Pride). Blooms July to September. Height, 3 feet. Color orangescarlet. Is an especially desirable perennial, with brilliant heads of flowers. 20 cts.; strong, 30 cts.

L. Haageana. A very showy perennial, remarkable for its striking flowers, nearly 2 inches across, of brilliant scarlet; hardy and easily grown. Height, 1 foot. July and August. 20 cts.; strong, 30 cts.

Lythrum roseum superbum (Loosestrife). A vigorous perennial, with spikes of bright rosecolored flowers, thriving best in a damp situation; useful for cutting. Height, 4 feet. July to September. 20 cts.; strong, 30 cts.

Mentha spicata (Spearmint). This is the hardy Spearmint, used largely for seasoning and making sauce. 15 cts.; strong, 25 cts.

Monarda didyma (Oswego Tea). Great clusters of brilliant scarlet flowers. 3 feet. June to September. 20 cts.; strong, 30 cts.
M., Cambridge Scarlet. Brilliant crimson-scarlet.

July and August. 20 cts.; strong, 30 cts.

Myosotis palustris semperflorens (Forget-menot). Clusters of dainty blue flowers; useful in a shady border and for forcing. 20c.; strong, 30c.

Pachysandra terminalis. A trailing plant 6 to 8 inches high, forming broad mats of bright glossy green foliage and small spikes of flowers during May and June. 20 cts.; strong, 30 cts.

Peonies. See page 58.

Papaver orientale (Oriental Poppy). Blooms June and July. Height, 2 to 3 feet. Scarlet flowers with a center spot as black as night upon which the light changes color all the time. 20c.; strong, 30c.

Papaver nudicaule (Iceland Poppy). Blooms June and September. Height, 12 inches. Colors mixed. The cup-shaped flowers vary in color from pure white to deep orange. 20 cts.; strong, 30 cts.

Pentstemon barbatus Torreyi (Beard Tongue). A stately, brilliant-flowering perennial, with long, loose panicles of bright scarlet flowers. 4 feet. July. 20 cts.; strong, 30 cts.

Phalaris arundinacea variegata (Ribbon Grass). Large, variegated foliage, valuable for bouquets and for edging large beds. 20 cts.; strong, 30c. Phlox. See page 62.

Physostegia Virginica (False Dragon-Head). Grows into a dense bush, covered with heath-like, pink, tubular flowers. Showy and reliable as a garden plant. 1 to 3 feet. July and August. 20 cts.; strong, 30 cts.

P. alba. A fine pure white variety of the above. 20 cts.; strong, 30 cts. P. rubra. Beautiful soft pink flowers in spikes. 20 cts.; strong, 30 cts. P. speciosa. A tall form, with bright pink, showy flowers. 2 feet. June. 20 cts.; strong, 30 cts.

Platycodon album (Japanese Bellflower). Blooms June to September. Height, 18 inches. Color white. 20 cts.; strong, 30 cts. P. grandiflorum. Deep blue, cupped, star-shaped flowers. 20c.; strong, 30c.

P. Mariesii. Blooms June to September. Height, 18 inches. Color blue. Similar to Grandiflorum but the flowers are deeper blue. 20c.; strong, 30c. Polygonum cuspidatum (Knotweed). August and September. A vigorousgrowing plant, 6 inches in height, with large, heart-shaped foliage and innumerable racemes of white flowers. Very useful for the wild garden, shrubbery borders, or for isolated positions on the lawn. 20c.; strong, 30c.

Hardy Sunflowers (see page 54)

SAINT PAUL, MINN.

HARDY PERENNIALS, continued

Pyrethrum roseum (Feverfew). Very beautiful, double flowers that range in color from pure white and the various shades of pink and red to deep purple. Main season of blooming is in June, but will flower again later. 20 cts.; strong, 30 cts.

P. uliginosum (Great Ox-eye Daisy). Stout, upright plants 4 to 5 feet high, with beautiful fern-like foliage; large flowers, 2 to 3 inches across, white with bright yellow center; long stems which are splendid for cutting purposes; very choice. August to October. 20 cts.; strong, 30 cts.

Ranunculus repens (Buttercup). June and July. A very freegrowing creeper, with double yellow flowers; foliage coarsely cut. 20 cts.; strong, 30 cts.

Rudbeckia laciniata (Golden Glow). Blooms July and August. Height, 5 to 6 feet. Color yellow. Its tall, swaying stems are aglow with golden yellow, dahlia-like flowers; used for background in borders and with shrubbery. 20 cts.; strong, 30 cts.

R. maxima. A rare and attractive variety, growing 5 feet high, with large, glaucous green leaves and bright yellow flowers 5 to 6 inches across, with a cone 2 inches high; flowers continuously from June to September. 25 cts.; strong, 35 cts.

R. Newmanii. Dark orange-yellow flowers, with deep purple

R. Newmanii. Dark orange-yellow flowers, with deep purple cone, borne on stiff, wiry stems 3 feet high; flowers from July to October. 20 cts.; strong, 30 cts.

R. triloba. Forms much-branched plants, 3 feet high, with masses of medium-sized yellow flowers with brown disk, during August and September. 20 cts.; strong, 30 cts.

Salvia Pitcheri. The flower is sky-blue, blooms in great profusion in September and is very attractive. Height, 3 to 4 feet. 25 cts.; strong, 35c.

Sedum spectabile (Brilliant Stonecrop). Blooms July and August. Height, 18 inches. Color rose. Of erect habit and the finest of the Sedums; large, oval, light green leaves and flat terminal cluster of rose-colored flowers. 20 cts.; strong, 30 cts.

of rose-colored flowers. 20 cts.; strong, 30 cts.

S. acre (Golden Mass). Blooms June and July. Height, 4 inches. Color golden. A low carpet plant, splendid for rockeries, wall gardens, edgings, or covering graves. 20 cts.; strong, 30 cts.

Shasta Daisy. See Chrysanthemum, page 51. Stokesia cyanea (Cornflower Aster). Blooms July and August. Height, 18 inches. Color deep blue. A desirable perennial, producing a succession of

Poppies are always showy (see page 56)

Statice latifolia (Sea Lavender). The minute bright blue flowers are produced in broad heads and are adapted for cutting, as they keep long after being dried, and are very showy. 1 to 2 feet. July to September. 20 cts.; strong, 30 cts.

Spiræa Filipendula fl.-pl. (Double-flowered Meadow Sweet). Numerous corymbs of double white flowers, on stems 12 inches high, during June and July, and pretty fern-like foliage. *20 cts.; strong, 30 cts.

S. Japonica. Large panicles of white, feathery flowers are borne freely in June and early July. Desirable for planting in masses. 2 feet. 20 cts.; strong, 30 cts.

S. palmata (Crimson Meadow Sweet). One of the most beautiful hardy plants, the deep purple-red of the stems and branches passing into the crimson-purple of the broad corymbs of flowers, which are produced very freely during June and July. 3 feet. 20 cts.; strong, 30 cts.

Valeriana officinalis (Hardy Garden Heliotrope). Produces showy rose-pink heads of flowers during June and July, with strong heliotrope fragrance. 20 cts.; strong, 30 cts.

Veronica longifolia. This plant grows about 3 feet high. Begins to bloom in July and flowers for a month. Flowers deep blue on long spikes. 20 cts.; strong, 30 cts.

V. spicata (Speedwell). Height, 18 inches. Color blue. Blooms continuously throughout the summer and is very attractive. Produces its flowers on long spikes. 20 cts.; strong, 30 cts.

V. Virginica. Tall-growing, with large and noticeably distinct spikes of white flowers. 5 feet. August. 20 cts. each; strong, 30 cts.

Viola (Violets). Many of the hardy forms of this dwarf species are easily grown, and should be more generally cultivated.

V. cornuta. (G. Wermig.) A variety of the tufted Pansy forming clumps that bloom the entire season. Most attractive in a border, and resembles the violet. 25 cts.; strong, 35 cts.

V., Hardy Russian. A robust-growing variety with large, single, fragrant, deep blue flowers. One of the finest hardy varieties. 20 cts.; strong, 30 cts.

Yucca filamentosa (Adam's Needle). Blooms June and July. Height, 4 feet. Color white. A charming plant to group in the hardy flower-border or as a specimen in the lawn. The tall spikes of bell-shaped flowers and the long, narrow leaves, edged with thread-like hair, are without an equal. 30 cts.; strong, 50 cts.

Flowers of the Platycodon (see page 56)

PEONIES

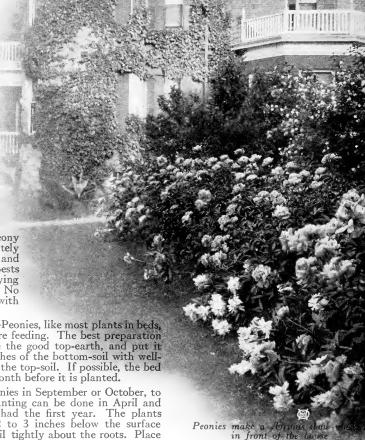

VER popular in our grandmother's garden as the "Piney." Today, with hundreds of improved sorts, the Peony rivals the rose in brilliant coloring, sweet fragrance, and perfection of flower. It is adapted to almost any garden soil and is extremely hardy in the Northwest. Flowers are larger than those of any other perennial, and are borne on stiff, strong stems.

Once planted, all is done; nothing more is required be-yond a liberal dressing of manure every fall, and each succeeding year adds to the size and beauty of the flowers.

Consider these features: The Peony is as hardy as the oak, absolutely free from disease of every kind, and entirely free from insects and pests of any sort. No dusting, spraying or hand-picking of worms. No roots to take up each fall, as with the dahlia.

How to Prepare the Soil.—Peonies, like most plants in beds, soon exhaust the soil and require feeding. The best preparation for their planting is to remove the good top-earth, and put it aside; then replace 12 to 15 inches of the bottom-soil with wellrotted manure, and fill up with the top-soil. If possible, the bed should be prepared at least a month before it is planted.

When to Plant.—Plant Peonies in September or October, to bloom the following June. Planting can be done in April and May but little bloom can be had the first year. The plants should be set with the eyes 2 to 3 inches below the surface of the ground, pressing the soil tightly about the roots. Place the clumps about 3 feet apart.

WHITE

Alba sulphurea. Large, creamy white bomb, very massive. One of the best whites of the bomb type. Superior to one often sold under this name. Divided roots, 50 cts. each; clumps, \$1 to \$1.50.

Couronne d'Or. Large blooms of ivory-white, with a circle of yellow which suggests the name; an extra-fine sort. Blooms rather late. 75 cts. each; clumps, \$1.50 to \$2.

Duchesse de Nemours. Here is a variety of unique beauty. The guard petals are extra large, the center is full; the color is the clearest transparent white, without red markings; the fragrance is unusually dainty. 75 cts. each; clumps, \$1.50 to \$2.

Festiva. Late midseason. Fine, very full, shell-formed bloom on strong stems; color fine ivorywhite, with a few carmine spots on the center petals; very fragrant. One of the best cut-flower sorts. 50 cts. each; clumps, \$1 to \$2.

Festiva maxima. Probably the greatest Peony ever grown. For fifty years it has held first rank and is still the standard of perfection by which all other Peonies are judged. The immense blooms, 7 or 8 inches in diameter, are borne over 40 inches above the ground on strong stems, and are of the purest paper-white, accentuated by an occasional flake of red in the center. One of

Festiva maxima, continued the very earliest to bloom, and extremely fragrant. 75 cts. each; clumps, \$1.50 to \$3.

Golden Harvest. An American variety comparing favorably with the best from Europe. Not very tall, but is large and one of the freest bloomers in the lot; color, blush white with creamy white guard, center carmine-tipped in most pleasing combination; midseason blooming period. 50 cts. each; clumps, \$1.50 to \$2.

Jeanne d'Arc. Soft pink; center sulphur-white. Very fragrant. This is one of the most desirable of the light-colored Peonies, being very free and a vigorous grower. Similar to but better than Golden Harvest. 50 cts. each; clumps, \$1 to \$2.

La Tulipe. Very large, shell-formed bloom; delicate rose, fading to creamy white; center petals tipped with carmine; outside of guard petals striped with carmine. Late. 75 cts. each; clumps, \$1.50 to \$2.

Madame Calot. Pinkish white, tinted with fleshcolor. Extra-fine variety. 75 cts. each; clumps, \$1.50 to \$2.

Madame Crousse. Very large, full, well-made flower; color snow-white, center petals edged with bright carmine. Extra fine for all purposes. Taken all together, this is, in our estimation, the best of all the white Peonies. 75 cts. each; clumps, \$1.50 to \$2.

PINK PEONIES

Alexandre Dumas. Brilliant pink, interspersed with white and salmon. Very early and free. One of the best for cut-flowers. 50 cts. each; clumps, \$1.50 to \$2.

Albert Crousse. Is colored and formed, with imbricated petals, like a big, flesh-pink carnation. Unusual shade for a Peony. \$2 each; clumps, \$3.50 to \$5.

Baroness Schroeder. A most delicate, light flesh-pink bud, bleaching when open to white; extra large and massive. The best of the English varieties. \$2.50 each; clumps, \$4 to \$6.

Delicatissima. Large flower of very delicate, clear pink. Fine buds and strong stem; fragrant, free and early. One of the best and most popular pinks. 75 cts. each; clumps, \$1.50 to \$2.

Edulis superba. Soft pink, very early. Large guard. 50 cts. each; clumps, \$1.50 to \$2.

Fragrans. One of the oldest, most sweet-smelling of the bright deep pinks, earliest to bloom and in every way very satisfactory. 50 cts. each; clumps, \$1.50 to \$2.

Lady Leonora Bramwell. Beautiful, large, rose-colored Peony. Very free. Splendid cut-flower sort. 50 cts. each; clumps, \$1.50 to \$2.

Livingstone. Pale rose, beautiful shadings with some carmine; would be considered a rose type. Blooms late, quite tall, on very strong stems. One of the best. 75 cts. each; clumps, \$1.50 to \$2.50.

Madame Boulanger. Light silvery pink, with flesh guard; regular and solid; rose shape; very large; exceedingly fragrant; late. One of the best pinks. 75 cts. each; clumps, \$1.50 to \$2.50.

Mme. Camille Bancel. This is one of the fine new sorts. Rich deep pink, lighter toward the center; very massive rose shape. \$1 each; clumps, \$2.50 to \$4.

Marguerite Gerard. Very pale salmon-pink, fading to almost white. Large compact rose type; medium height; very strong growth. Late. 75 cts. each; clumps, \$2 and \$2.50.

Mons. Jules Elie. Very large, medium compact, high crown. Color pale lilac-rose, collar shaded amber-yellow at base; very fragrant; medium height; strong grower. Early and of extra quality. \$1 each; clumps, \$2.50 and \$3.

Therese. Very large; medium compact; rose type; developing later a high crown. Color violet-rose, changing to lilac-white in the center. Strong, erect, medium tall; free bloomer; midseason; one of the very best and most desirable varieties. \$5 each.

Lectures on Landscaping

Civic Improvement Societies and similar organizations may secure the services of our lecturer on Landscape Plans and like topics. It will be well to write us considerably in advance, so that a satisfactory date can be arranged.

stance and color, keeping best of all when cut. Very thrifty in growth. 50 cts. each; clumps, \$1.50 to \$2.

beauty of the Peony is enhanced by planting

in large beds

WHITE PEONIES, continued

Madame de Verneville. One of the most charming varieties on the market. The guard petals are pure white, very large and folding over the

flower; balance is suffused with daintiest blush,

except a few cream-colored petals and four red flakes in center, the total being an exceptionally

beautiful flower. Has a more delightfully delicate fragrance than any other. Always blooms early

and very freely. One of the absolutely indispensable varieties. \$1 each; clumps, \$2 to \$3.

latest white to bloom, thus extending the season after earlier ones are passed. It has immense creamy or ivory-white blooms, with an occasional

carmine tip on center petals. Very stiff stems.

Queen Victoria. A large, full flower of good sub-

75 cts. each; clumps, \$1.50 to \$2.50.

A valuable sort because the

Marie Lemoine.

very best and most desirable varieties. \$5 each.

RED PEONIES

Auguste Villaume. Immense bloom of American Beauty shade. Great for exhibition purposes. 75 cts. each; clumps, \$2 to \$3.

Delachei. Deep rich crimson-maroon with velvety sheen. One of the best dark reds, and extremely striking in masses. Dark, glossy foliage. 50 cts. each; clumps, \$1.50 to \$2.

A typical Peony plant

RED PEONIES, continued

Edouard Andre. Large, globular bloom; deep crimson with metallic luster on the reflex of the petals; striking color; strong grower. Divided roots. 75 cts. each; clumps, \$2 to \$3.

Felix Crousse. Bright red bomb, distinct color, very large and massive; very free, grand in every way. 75c. each; clumps, \$2 to \$3.

Karl Rosenfield. Very large, globular, compact semi-rose type. Dark crimson; very strong; tall; compact grower and free bloomer. Mid-season. Slightly fragrant and very agreeable. Splendid keeper. A very brilliant and striking variety. \$5 each.

The way our Peonies grow

Lee's Grandiflora rubra. Rich red, resembling an American Beauty rose; of enormous size and long stem. One of the latest and best. 50 cts. each; clumps, \$1.50 to \$2.

Louis Van Houtte. Velvety purple; very dark color and fine form. Plant vigorous in growth, with fine foliage. 50 cts. each; clumps, \$1.50 to \$2.

Madame Bucquet. Very dark maroon-purple, beautiful bud, large bloom; very free bloomer. The best dark red or "black," with stamens. All who see it insist on having it. 50 cts. each; clumps, \$1.50 to \$2.

Mikado. Japanese type. Dark crimson cup-shaped guard with narrow filamental petals; crimson edged and tipped gold; like a giant red poppy. \$1.50 each; clumps, \$2.50 and \$3.

Officinalis rubra. This is the old-fashioned red, the most brilliant of all red Peonies. Early and splendid cut-flower. 50 cts. each; clumps, \$1.50 to \$2.

Richardson's Rubra su-perba. Rich, deep crimson; latest of all. Very sweet. 75 cts. each; clumps, \$2 to \$3.

Tenuifolia. Flowers double; brilliant crimson; fine, feathery foliage; very e a r I y . 50 cts. each; clumps, \$1.50 to \$2.

UNNAMED **PEONIES**

These are all fine, vigorous roots, and will produce splendid plants and handsome flowers. Some of the best named sorts are in this mixture; if we were sure of the name, you could not buy them at this price. They are useful for mass planting where separate colors are not specially important. 25, 35, and 50 cts. each.

JAPAN TREE **PEONIES**

The Tree Peonies grow in the form of a dwarf shrub. very free flowering, blooming earlier than the herbaceous sorts, and while also perfectly hardy it is best to give them some protection. Order by colors, as the Japanese names do not look good in print. \$1.50 each, \$12.50 for 10.

Peonies grouped with shrubs are always attractive when in bloom

Whether planted in solid masses, or in small groups among the shrubs, the Irises command instant attention

IRIS

O garden is complete without a good selection of these lovely flowers. Many places are found where they can be used, and they are always attractive and welcome, blooming in early summer, before most of the shrubs. A good border flower for planting along paths, for grouping in beds. You can have blossoms from May until July, by selecting early and late sorts.

GERMAN IRIS

Aurea. Pure chrome-yellow. 20 cts.; strong, 30 cts. Bridesmaid. Standards white, shaded silvery lilac; falls slightly frilled, soft lilac. 20 cts.; strong, 30c. arius. Standards Iemon-yellow; falls purple, shading to pale yellow; large. 20c.; strong, 30c.

Edith. Standards light plumbago-blue; falls purple. 20 cts.; strong, 30 cts.

Fairy. Standards ivory, changing to white; falls white with pale violet vening. 25c.; strong, 50c. Florentina. Standards and falls white, with faint lavender tint; large and fragrant. 20c.; strong, 30c. Her Majesty. Standards lilac-pink; falls deep reddish lilac, with dark veinings. 35c.; strong, 50c. Honorabilis. Standards golden yellow; falls rich mahogany-brown. 20 cts.; strong, 30 cts.

Julius Cæsar. Standards amber; falls deep purple.

20 cts.; strong, 30 cts. Lohengrin. Foliage and flowers of gigantic size, and of a deep violet-mauve. 35 cts.; strong, 50c. Madame Chereau. Standards and falls white,

frilled violet. 25 cts.; strong, 35 cts.
Pallida Dalmatica. Strong, vigorous habit; large flowers; layender, shaded blue. 35c.; strong, 50c. Penelope. Standards white, speckled violet; falls white, veined reddish violet. 20 cts.; strong, 30c. Queen of May. Lovely soft lilac-pink shaded to rose-pink. 25 cts.; strong, 35 cts.

Sappho. Standards deep violet-blue; falls dark, velvety, royal purple. 35 cts.; strong, 50 cts.

Sherwin-Wright. Vigorous growing, free flowering, golden yellow. 75 cts.; strong, \$1. Unnamed Varieties, All Shades. 15 cts., \$10

per 100; strong, 25 cts.

JAPANESE IRIS (Iris Kaempferi)

Commence blooming about the middle of June, and continue for five or six weeks.

Blue Jay. Fine azure-blue, freely mottled. 35 cts.; strong, 50 cts.
Eclaire. Largest white. 35 cts.; strong, 50 cts. Mt. Hood. Light blue, shaded darker. 35 cts.;

strong, 50 cts. Paragon. Rich, velvety purple, center marked with orange. 35 cts.; strong, 50 cts.

Sakata. Lavender-blue, with deeper veinings; minor petals ageratum-blue. 35 cts.; strong, 50c. Spotted Beauty. Large size, double; silky white. 35 cts.; strong, 50 cts.

Violet-purple, with white veins. 35 cts.; Victor.

strong, 50 cts.

SIBERIAN IRIS

Blue. Flowers similar to the German Iris. Clear, rich blue, but smaller. Strong growers. 20 cts.; strong, 30 cts.

White. A fine, pure white form. 20 cts.; strong, 30c. Snow Queen. Large, snow-white flowers carried on

strong stems. 25 cts.; strong, 35 cts.

THE PARK NURSERIES

The great trusses of the Phlox bend and sway in summer breezes

HARDY PHLOX

THE FINEST and most useful of the herbaceous plants. They succeed in almost any soil, or in any position, and flower throughout a long season. The plants remain in good condition for many years without attention, other than cultivating, and respond rapidly to improved cultivation and care. By a careful selection of the early and late varieties, and by cutting off the flower-heads as soon as the blossoms fade, it is possible to have Phlox in bloom from June until late fall.

Planting.—Phlox may be planted in the autumn, from the 1st to the 15th of October, so as to become established before winter; but when they are to be planted in conjunction with other perennials, wait until spring. Plant early, for Phlox puts out new growth as soon as the frost leaves the ground. Always mulch with well-rotted manure; this will be beneficial to the plants, both summer and winter.

The ground where Phlox is to be planted should be trenched a foot or more in depth, and a layer of well-decomposed manure placed in the bottom of the trench, which should then be filled very full with alternate layers of a few inches each of good top soil and manure. Whether planted in spring or fall, a mulch of old manure thrown around the roots will be of benefit to the plants. Phlox should be set out 18 inches apart.

Baron Van Dedem. A variety somewhat in the style of Coquelicot, but it produces much larger trusses and its flowers are nearly twice as large. In color it is of a glistening scarlet-blood-red. 25c.; strong, 50c.
Beranger. Ground-color white, delicately suffused with rosy pink, with a distinct red eye; height medium. 20 cts.; strong, 30 cts.

Bridesmaid. Pure white, with large, crimson-carmine eye; very fine; tall. 20 cts.; strong, 30 cts. Coquelicot. A fine orange-scarlet, with crimson eye; very fine; medium. 20 cts.; strong, 30 cts.

Dr. Konigshofer. Brilliant orange-scarlet, with dark blood-red eye. Finer and more brilliant in color than Coquelicot, and more compact. 25 cts.; strong, 50 cts.

Elizabeth Campbell. Very large spikes, with flowers of quite a new color—light salmon changing to pink in the center. It is the best pink Phlox and the best of bedders. 25 cts.; strong, 50 cts.

Eugene Danzanvillier. Lilac, shading white. 20 cts.; strong, 30 cts. Frau Anton Buchner. Undoubtedly the finest pure white Phlox which has as yet been raised. It has a strong habit, and produces flowers of an enormous size and perfect form. 25 cts.; strong, 50 cts.

F. G. von Lassburg. Purest white; individual flowers very large. One of the best for massing; tall. 20 cts.; strong, 30 cts.

General Van Heutz. Brilliant salmon-red, with white center; very large heads; free bloomer; extra fine; medium height. 20 cts.; strong, 30 cts.

Goliath. A new, distinct variety of attractive appearance. It is of gigantic growth and attains a height of 5 to 6 feet, producing large trusses, with flowers of a bright carmine, with dark carmine-red center. 25 cts.; strong, 50 cts.

Elizabeth Campbell Phlox

Hardy Phlox makes a brilliant show in the garden in late summer

HARDY PHLOX, continued

Hermine. The dwarfest variety in our collection, never exceeding 10 inches in height. Pure white flowers of good size; early. Unequaled for borders of beds. 20 cts.; strong, 30 cts.

Henri Murger. Large; pure white, with large carmine center; very fine; dwarf; fine for edging. 20 cts.; strong, 30 cts.

Jeanne d'Arc. Pure white, large-flowering variety. Very late; tall. 20 cts.; strong, 30 cts.

Miss Lingard. Fine white; free bloomer. Early; begins flowering after the middle of June and continues throughout the season. Medium. 25 cts.; strong, 30 cts.

Mme. Paul Dutrie. A delicate lilac-rose, reminding one of some of the beautiful soft pink orchids. The flowers are very large and borne in panicles of immense size. Height, tall. 20 cts.; strong,

Mrs. Arthur Baker. Fine salmon; very distinct; medium height. 20 cts.; strong, 30 cts.

Madame Bezanson. Deep crimson; very fine; medium height. 20 cts.; strong, 30 cts. Pantheon. Deep salmon-rose. Very large flower,

light center; tall. 20 cts.; strong, 30 cts.

Rheinlander. A most beautiful salmon-pink, with flowers and trusses of immense size. 25 cts.; strong, 35 cts.

Rynstrom. A great improvement on the popular variety Pantheon; of the same carmine-rose color as Paul Neyron rose. 25 cts.; strong, 35 cts.

R. P. Struthers. Rosy carmine with claret eye; very bright; tall. 20 cts.; strong, 30 cts.

Selma. It has a strong habit, and produces large trusses of very large, pink flowers, with cherry-red eye. 25 cts.; strong, 50 cts. Richard Wallace. Cherry flowers with violet center. Tall. 20 cts.; strong, 30 cts.

Von Gœthe. Pure clear pink with white eye; very fine; medium height. 20 cts.; strong, 30 cts.

Von Hochberg. The ideal crimson. The richest of its color. 20 cts.; strong, 30 cts.

PHLOX ARENDSII. A new race of hardy Phlox, of a dwarf nature, growing according to variety from 12 to 24 inches high. Begin blooming early in June, and bloom for two months.

Charlotte. Grows 18 to 24 inches high. Flowers very large, pale lilac, shaded pink, with a prominent dark eye. One of the best. 25 cts.; strong, 35 cts.

Grete. Plant of very branching habit. 20 inches high. Produces great masses of medium-sized white flowers. 25 cts.; strong, 35 cts.

Kathe. Stems loosely branched about 20 inches high; flowers purplish red, with a dark eye surmounted by a lighter halo. plants are strong in habit of growth and throw many flowerstems. 25 cts.; strong, 35 cts.

PHLOX SUBULATA. An early spring-flowering type, which during the flowering season is a mass of bloom. An excellent plant for the rockery and border, and invaluable for carpeting the ground or covering graves.

Rosea. Pink. 20 cts.; strong, 30 cts. Alba. White. 20 cts.; strong, 30 cts.

Hardy Phlox, F. G. von Lassburg

Climbing roses on a south exposure always do well

HARDY ROSES

OSES—the name is an inspiration to garden-lovers—are justly classed among the showiest and best plants for decorating the home grounds. No garden is complete without them, no arrangements satisfactory that neglect them; in fact, they are indispensable. Fortunately, it is possible to select from the numerous species and garden forms varieties that are adapted to almost every requirement.

During the past few years, a larger number of new varieties of Roses have been introduced and sold which have no practical value in our climate. For this reason, we take great care to include in our lists only such varieties as are worthy of general cultivation, and are hardy. We have precessarily confined our descriptions to a few leading varieties.

hardy. We have necessarily confined our descriptions to a few leading varieties.

When to Plant.—We recommend spring planting, as our winters are too severe for planting in the fall.

Dormant plants should be set early. Our potted plants can be set as soon as danger of frost is past, and up to June 1.

Location.—Roses require a good warm location, where they will get sufficient sunshine.

Soil.—They will grow in any rich soil. A liberal supply of fertilizer, with good cultivation, will improve both flower and fragrance.

PRICES OF ROSES

Prices of all Roses, except where noted, are given in the table prices and are made for two-year, strong plants. We make prices for the dormant bushes, also for potted plants; those potted are the same size, but are started and can be planted with a ball of earth, thus assuring success under ordinary conditions. The dormant plants require a longer time to start.

Each 10

HYBRID PERPETUAL ROSES

Alfred Colomb. Cherry-red, passing to bright rich crimson; flowers

extra large, double and full.

Anna de Diesbach. Brilliant crimson; a superb garden sort; fragrant.

Baron de Bonstetten. Rich dark red, passing to velvety maroon; highly fragrant. Captain Christy. Very large and full

flower, color shell-pink, shading darker in center; strong grower.

Captain Hayward. Crimson-carmine; large

perfect form; fragrant and very satisfactory.

Clio. Flowers large, of fine globular form;

flesh-color, shaded rosy pink center.

Eugene Furst. Dark crimson of a beautiful

striking shade; strong grower.

Fisher Holmes. One of the choicest.

Color brilliant carmine-crimson.

Frau Karl Druschki (see page 65)

The joy of gardening can be fully realized with a bed of Roses like this

HYBRID PERPETUAL ROSES, continued

Frau Karl Druschki. Flowers are very large: beautiful, pure silvery white, with very deep bud. This is the best white Hybrid Perpetual yet introduced.

General Jacqueminot. Brilliant crimson; large and very fine; one of the handsomest and most showy Roses of this color.

John Hopper. Bright rose, with carmine center; semi-globular; free bloomer.

Louis Van Houtte. Crimson-maroon; large, full and fragrant.

Madame Gabrielle Luizet. A magnificent pink Rose; very large and possesses a pleasing fragrance.

Magna Charta. Bright pink, suffused with carmine; very large, full and fragrant.

Margaret Dickson. Pure white; fine form, very large; a strong grower and a free bloomer.

Marshall P. Wilder. Color cherry-carmine, richly shaded with maroon; very fragrant and a free bloomer. Marie Bauman. Bright carmine-red; large and full. Mrs. John Laing. One of the finest Roses of its class. Color a soft, delicate pink, with a satiny

Paul Neyron. This magnificent Rose is by far the largest variety in cultivation; very double and full; of a beautiful deep rose-color and delightfully fragrant.

Prince Camille de Rohan. A velvety blackish crimson Rose, of deep, distinct shade; large, full; very handsome.

Ulrich Brunner. A Rose of beautiful form and finish, very striking from its color of brilliant cherry-crimson.

MOSS ROSES

Blanche Moreau. Pure white; large, full, perfectly formed.

Crested Moss. Deep pink buds, with a mossy crest; exquisitely fragrant. One of the best.

Henry Martin. Rich, glossy pink, tinged with crimson; large, globular flowers, finely mossed.

rincess Adelaide. Fine reddish blush; large and

William Lobb. Violet-red; a strong grower.

YELLOW ROSES

Price, 2-yr., strong, dormant plants, 50c. each, \$4 for 10

Yellow. Semi - double; Harison's bright yellow; showy and fine; blooms very early; one of the best of its color.

Persian Yellow. Deep golden yellow; semi-double.

Soleil d'Or. This Rose is the result of a cross between Persian Yellow and Antoine Ducher. It is a fine, strong grower, producing superb, conicalshaped buds varying from gold and orange-yellow to reddish gold shaded with nasturtium-red.

Madame Gabrielle Luizet

Prince Camille de Roban

Gruss an Teplitz

TEA AND HYBRID TEA ROSES

EVERBLOOMING ROSES

Our list of Hybrid Tea Roses comprises the very best to be had, many of the finest that have been introduced in recent years, and the leaders of the standard sorts.

Strong, 5-inch pot-plants, 75c. ea., \$6 for 10, except where noted

Augustus Hartmann. New brilliant geranium-red flushed orange; large, beautiful flowers. Mildew-proof. \$1.50 each, \$12 for 10.

Caroline Testout. Large, full, globular flowers of bright satiny rose, with brighter center.

Cheerful. New; pure orange, the flame shading overspreading the petal, giving it a wonderful effect; its distinct orange-yellow base creating a color combination unknown to Roses. Sweetly scented. \$2 ea., \$18 for 10. Clothilde Soupert. Outer petals pearl-white, shading to a

center of rosy pink.

deep orange-yellow flushed copper-yellow. \$2 each, \$18 for 10.

Gruss an Teplitz. Scarlet, shading to velvety crimson; very fragrant; free bloomer. Heinrich Munch. Soft pink; large and full; very satisfactory and very attractive in the garden.

Hermosa. Daintily cupped flowers of pretty pink.

Iona Herdman. A pure clear orange, the greatest color yet attained in clearness and brightness; true Hybrid Tea growth. The most beautiful yellow rose in cultivation. \$2 each, \$18 for 10.
Juliet. Outside petals old gold, interior rich rosy red, changing to deep rose as flower expands.

Juliet. Outside petais old gold, interior rich rosy red, changing to deep rose as flower expands.

Lady Mary Ward. Color rich orange, shaded deeper apricot, sweetly perfumed. \$1 each, \$8 for 10.

La France. Silvery rose, changing to silvery pink; large. Kaiserin Augusta Victoria. Creamy white; sweetly fragrant; very full and large flowers.

Killarney. Color flesh, shaded white, suffused pale pink. Le Progres. Buds golden, changing to nankeen and pale yellow as the flower expands; large, cup-shaped.

Maman Cochet. Deep rose-pink, inner side of petals silvery rose; double; exquisite in bud or full blown.

Mme. Edouard Herriot. Coral-red, shaded yellow and

scarlet. \$1 each, \$8 for 10.

Mme. Jenny Guillemot. A very soft shade of nankeenyellow, suffused with carmine; very long buds.

Mrs. Andrew Carnegie. White; lemon-tinted.
Mrs. Aaron Ward. Few Roses attract so much attention as this beautiful French introduction. Distinct Indian yellow, shading lighter toward edges. Free-flowering.

Mrs. Frank Bray. New. Deep rich coppery color, turning to coppery fawn and ivory-pink. \$1 each, \$8 for 10.
Mrs. Frederick W. Vanderbilt. New. Deep orange-red,

shaded apricot-red. \$2 each, \$18 for 10.

Mrs. George Norwood. New. Pink and gold. Almost a perfect pink Frau Karl Druschki, but more durable. \$2 each, \$18 for 10.

Mrs. Hugh Dickson. New. Color deep cream with heavy suffusion of orange. Fragrant. \$2 each, \$18 for 10.
Mrs. Muir MacKean. New. Bright carmine-crimson, without shading. \$1.50 each, \$12 for 10.
National Emblem. New. Beautiful dark crimson, shad-

National Emblem. New. Beautiful dark crimson, shading to vermilion at the edge, with petals of ivory-like substance. Mildew-proof. \$2 each, \$18 for 10.

Rayon d'Or. Yellow cadmium toning to sunflower-yellow. Richmond. Large; rich velvety crimson; fragrant. Souvenir de Catherine Guillot. Coppery carmine, shaded with yellow.

in bush form

BUSH ROSES

This type of Roses is desirable in connection with shrubbery plantings and to be grouped by themselves. They are good for banks, borders, and patchwork. They do not need protection and are of the single type. Their foliage They do not is beautiful and gives a naturalistic effect.

2-yr., strong, dormant plants, 35 cts. each, \$3 for 10

Blanda (Meadow Rose). Large pink flower followed by red fruit, same as Rugosa; habit erect; red bark in winter. Carolina. The flowers are pink and come in flat clusters.

The individual blooms are 2 inches in diameter and delicately formed; fruit red and showy.

Lucida. May to July. A fine native, with rosy pink flowers. Does well on poor soil and grows very rapidly. Has red stems and hips in winter.

Multiflora. Its single, pure white blossoms are produced in immense quantities.

Rubrifolia. Quite unique and conspicuous for its high-colored, reddish purple leaves, retained throughout the summer. Deep red flowers.

Setigera. The typical Prairie Rose, with brilliant pink flowers. All modern landscape planters are now giving recognition to its merits and usefulness.

2-yr., strong dormant plants, 50 cts. each, \$4 for 10

American Pillar. A single-flowering variety of great beauty, which appeals to everyone. The flowers are of enormous size, 3 to 4 inches across,

of a lovely shade of pink, with a clear white eye and cluster of yellow stamens. These flowers are borne in immense bunches, and a large plant in full bloom is a sight not easily forgotten.

Crimson Rambler. The famous crimson-clustered climber, so extremely effective when grown on pillars

and trellises. Combined with the waxy pale green, red-veined foliage, the crimson mass of bloom makes an irresistible effect.

Dorothy Perkins. Clear shell-pink, with flowers borne in clusters; full and double, with crinkled petals. Excelsa. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces clusters. Intense crimson-maroon, the tips of

Lady Gay. The flowers in large, loose clusters are of a delicate

cherry-pink, fading to soft tinted white.
Philadelphia Rambler. An improvement on the famous Crimson Rambler, flowers being larger, more double and of a light crimson.

Prairie Queen. Bright rosy red; large, compact and globular flower.

Tausendschon. Its innumerable clusters of large flowers are first a soft pink, later deepening to a bright carmine-rose. A variety that has only one or two equals and no superiors. A rapid grower and free bloomer.

2-yr., strong, dormant plants, 50 cts. each, \$4 for 10

Agnes Emily Carman. Flowers large, semi-double, rich, deep crimson.

Blanc de Coubert. A hybrid variety of merit; flowers pure white, semi-double, fragrant.

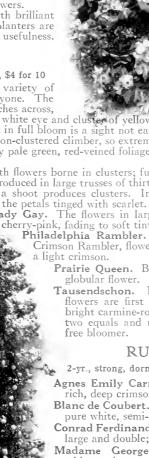

Conrad Ferdinand Meyer. Flower clear, silvery rose, large and double; very fragrant.

Madame Georges Bruant. Very free-blooming white variety.

New Century. Large flowers, bright rosy pink, with red center.

Nova Zembla. This beautiful new Rose is a sport of the well-known Conrad Ferdinand Meyer.

Rugosa rosea. Bears pink flowers and bright red hips. Rugosa alba. Pure white, single and fully as attractive in the bud as when open.

The most beautiful of all climbers, Dorothy Perkins

DWARF POLYANTHA, or BABY RAMBLER ROSES

This type of Roses has been in existence only a few years. They were first used only as potted Roses, for the Easter trade, but were found excellent for outside planting, blooming constantly through the summer.

2-yr., strong, potted plants, 75 cts. each, \$6 for 10, except where noted

Baby Rambler (Mme. Norbert Levavasever). The original dwarf from the Crimson Rambler. The wonderful persistency of its blooming makes it one of the choicest plants in cultivation.

Baby Tausendschon. Dwarf and bushy growth; flowers semi-double in pretty clusters; color flesh-pink.

Betsy Vannes. New. This grand novelty is a sport from Mrs. W. Cutbush, but a stronger grower with fine light green foliage. Flowers large, double, bright pure red, keeping this color until they wither. \$1 each, \$8 for 10.

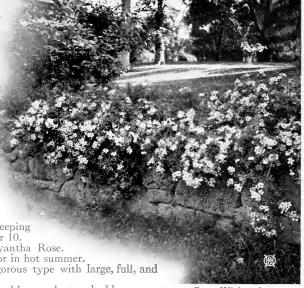

Erna Teschendorf. A vivid crimson Polyantha Rose.
The best red Baby Ramblers; holds its color in hot summer.

Ellen Poulsen. New. A very free and vigorous type with large, full, and sweet-scented clusters of dark pink blooms.

Jessie. Richmond-red and does not fade; good house-plant or bedder.

Mrs. Wm. H. Cutbush. Pink Baby Rambler, of dwarf type and, when planted outside, blooms all summer. Flowers are pale pink, borne in extra large trusses.

orleans. Geranium-red with a distinct center of pure white; free bloomer. A late introduction.

Rosa Wichuraiana

WICHURAIANA, MEMORIAL or EVERGREEN ROSES Each

Gardenia. Bright yellow flowers. Delightfully fragrant. One of the best.

Manda's Triumph. Flowers pure white, very double, produced in clusters of from ten to twelve. South Orange Perfection. Similar to the preceding in growth.

Universal Favorite. Vigorous grower, with long, branching shoots that are covered with dense, bright green, shining foliage. Flowers are very double.

Wichuraiana. A low, trailing species, its stems creeping on the earth as closely as ivy, and forming a dense mat of very dark green, lustrous foliage. The flowers are produced in greatest profusion, and in clusters.

SWEETBRIER ROSES

The foliage is deliciously scented; the flowers are of the most beautiful tints and produced in great profusion; perfectly hardy.

Each 10

Anne of Geierstein. Large, handsome, deep crimson flowers; graceful branching habit; delightfully fragrant.

Lady Penzance. Beautiful soft tint of copper, base of petals bright

yellow; very fragrant; free bloomer.

Rubiginosa. The well-known Sweetbrier, with highly scented foliage, pink, fragrant flowers and quantities of bright hips. Blooms in June.

Sweetbrier type of Roses

TREE ROSES

Our Tree Roses are grafted on hardy Rose-stalks, 4 to 5 feet high. We offer Hybrid Perpetuals, Hybrid Teas, Crimson Rambler and Baby Rambler. Fine, strong trees that will bloom nicely the first year. Each 10

FRUIT DEPARTMENT

HE growing of hardy fruits has been increasing from year to year, and with the improved methods and improved varieties, together with the growing of the trees in the sections where they are to be planted, so that they have become acclimated to our climate, insures success.

they are to be planted, so that they have become acclimated to our climate, insures success. We do not offer an extensive list of fruits; our specialty is ornamentals. We grow all classes of fruits for our trade, but, as we cater to the ornamental more than the fruit trade, the demand for this stock is not so heavy. We have made an exhaustive study of this subject, and have selected only those varieties that are best adapted to the Northwest. Our stock of all the various fruit trees, vines and plants is in fine condition, well rooted, vigorous and free from all disease, and grown under the most improved methods, which

has been the secret of our success in this business, furnishing our patrons what they want and of the very best quality, at reasonable prices.

APPLES

Apples require a well-drained soil, and the location best suited is an east or northeast slope, with clay soil preferred to sand. Trees should be planted about 25 feet apart. Each 10 100

area about 25 reet apart.	Lacn	10	100

APPLE NOVELTY

We have a stock of top-worked Apple trees, grafted with three and four varieties, such as Duchess of Oldenburg, Wealthy, Okabena and Patten's Greening, making it possible to get three and four varieties from the same tree. Such trees are just the thing for city lots.

Anisin. A most valuable sort from Russia. Fruit of medium size, most excellent flavor, and keeps a long time in good condition.

Duchess of Oldenburg. Fruit extra size, pale green, shading to white, beautifully striped; tender and juicy; highly esteemed for market and domestic use. One of the most profitable. August and September.

Duchess of Oldenburg Apple

THE PARK NURSERIES

Wealthy Apple

APPLES, continued

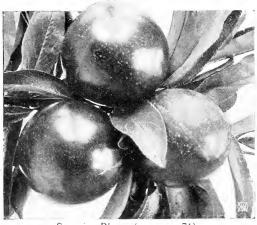

Hibernal. This variety represents what is probably the hardiest type of the Russian family, and is known as the standard of hardiness. Tree vigorous, spreading and productive. Fruits large to very large, irregular in shape, greenish yellow, with dull bronze-red on sunny side. November to December.

Longfield. A free, upright-grower; fruit medium to large, yellowish green with red stripes. December to March.

Malinda. An exceedingly hardy variety, one of the very best in the entire list for the Northwest. Medium to large; rich yellow, with dull blush; white dots; flesh yellowish white, firm, subacid, crisp and juicy. A splendid cooking Apple. December to March.

Northwestern Greening. Fruit a pale green, sometimes tinted with a little red. Very large, and of excellent quality. One of the finest for cooking. March to April.

Okabena. A seedling of Wealthy, fertilized by Duchess. The fruit is medium in size, slightly flattened, very highly colored where exposed to the rays of the sun, resembling Duchess. The flesh is fine-grained. As an eating Apple it cannot be excelled.

Surprise Plums (see page 71)

Patten's Greening. A seedling of Duchess and equal to it in hardiness and productiveness. Fruit large, uniform size, pleasant acid, equally good for cooking or eating. One of the best for the Northwest. February to March.

Peerless. Minnesota origin. Fruit medium to large; yellowish green with stripes. Tree vigorous, grows upright; has been extensively planted. October to December.

Wealthy. Minnesota origin. Tree very hardy, an early and abundant bearer; fruit dark crimson in color; flesh crisp and sub-acid; white, tinted with red; quality second to none. The best commercial Apple for Minnesota. November to February.

Wolf River. Wisconsin origin. One of the largest Apples grown in the North; color yellowish green with stripes of carmine, very handsome and showy; flesh nearly white. Tree vigorous and fairly productive for a large Apple. October to January.

Yellow Transparent. Russian origin. One of the earliest of Apples; fruit medium; smooth, transparent skin, clear white, becoming pale yellow when fully ripe; flesh white and tender. Tree is moderately vigorous, and a good annual bearer.

CRAB APPLES

Prices same as Standard Apples

Early Strawberry. Tree a good grower, symmetrical, hardy; fruit size of Transcendent, red striped, excellent for eating.

Hyslop. One of the most popular of the Crabs, a good grower and very hardy; fruit large; deep crimson; flesh white tinted with red, an abundant bearer. September to November.

Minnesota. Hardy, medium grower; fruit large; color light with blush on sunny side; quality excellent. In size, beauty and keeping qualities it is the best. January to February.

Siberian. Fruit small, round; flavor sour and acid; excellent for jelly, but too small for other purposes. Tree is a good grower and handsome. October.

Whitney. One of the largest; glossy green, splashed with carmine; firm, juicy, pleasant; great bearer; excellent for cider. August and September.

PLUMS

The class of Plums we offer are those that are perfectly hardy. Many of the best varieties known as Japan and European sorts will not stand our severe climate, hence we offer only those that can be grown in Minnesota, known as the American type. Much improvement has been accomplished in recent

De Soto. Perfectly hardy; a splendid bearer; fruit very large; meat sweet, firm and juicy; red and yellow.

Forest Garden. Hardy; bears profusely; one of the earliest; size large, oblong; color mottled red and yellow; skin thin, juicy, sweet and rich.

Hawkeye. Very hardy and a strong grower. Fruit is not bothered with curculio. Large, mottled dark red; very attractive and of superior quality.

Surprise. This is considered the best of the native type of Plums. It is a seedling of Minnesota origin, and is by far the best and finest quality of any in cultivation, also the hardiest ever introduced. Fruit very large; skin medium thick, tender, bright red; flesh pale yellow; quality extra good. Trees are upright growers.

Stoddard. Fruit oblong, oval, large, with little or no cavity, short and stout stem; color pinkish red over yellow; skin thick, making a good shipper, flesh yellow, fairly juicy and of good quality; tree a vigorous, upright grower and very hardy.

Wolf. One of the very largest and a perfect freestone. Excellent for cooking, or for serving with sugar and cream. Tree a good grower and very hardy.

CHERRIES

The Morellos are the only Cherries that are hardy in the Northwest, with the exception of some natives or crosses with the plum. The Morellos grow slow and are smaller trees and are commonly known as the Pie Cherry.

Early Richmond. An exceedingly productive variety, fruit dark red of medium size; very early.

English Morello. Large, dark red, nearly black, tender, juicy and rich; tree dwarf and slender.

Montmorency. Large and finer than early Richmond, and one of the finest flavored Cherries grown. Tree strong, hardy and rapid grower, bears enormous crops.

Ostheimer. Large, nearly black when ripe; juicy and rich; fine for cooking a I for market; late.

Vladimer. Of medium size; mildly acid; excellent. A Russian sort adapted for northern sections.

Wragg. Very similar to English Morellos, but said to be a hardier tree; originated in the West, and has proved entirely satisfactory.

Homer. A valuable seedling, originating in Minnesota, distinctly of the Morello type; fruit good size; flesh juicy, rich and of excellent quality; flavor similar to Early Richmond, color dark red. Has attracted much attention among Minnesota growers and is being planted quite extensively. 5 to 6 feet, \$1 each, \$9 for 10.

PLUM-CHERRY

Compass. This hybrid, a cross between the Miner Plum and the Sand Cherry, has been a great acquisition to the fruit growers of the northern states. While the quality of the fruit is not so good as the Morello type, it is much hardier and can be grown in any section of the Northwest or western Canada. The tree is very productive, will produce good quantities of fruit at two years old, and continues to increase as the tree grows older; it has a tendency to over-produce. Fruit bright red, same size as the Morellos but with large pit. Prices same as Plums.

Montmorency Chefries

GRAPES

Along almost any garden fence or walk, there is room for vines to furnish fruit enough for the family, from July to November. For such locations they should be planted from 6 to 8 feet apart and kept cultivated. We list the best varieties for this climate.

BLACK AND BLUE GRAPES Beta. Originated at the Minnesota State Experi-

mental Station. Is a cross between the wild Grape and Moore's Early. The berry is large, but quite acid, and not so good for eating as many of the others, but for pies, jelly, wine or grape-juice, it is fine. It is also a fine vine for trellis work, being perfectly hardy and requires no attention during the winter. Strong, 2 years, 50 cts. each, \$4.50 for 10.

Concord. Large, handsome, black Grapes; a very hardy, reliable and productive variety, succeeding everywhere, and one of the most popular market sorts. More largely planted than any other black Grape. Strong, 2 years, 25 cts. each, \$2 for 10.

Campbell's Early. A fine new Grape. Clusters large, compact and handsome; berries large, nearly round; black, with light purple bloom; flesh firm, but tender; the seeds are few; quality rich, sweet, slightly vinous; a strong and vigorous grower with healthy foliage; it ripens very early; the berries do not drop easily from the clusters, and the fruit keeps a long time in perfection. Strong, 2 years, 50 cts. each, \$4 for 10.

Moore's Early. Bunch and berry, large, with a blue bloom; quality better than Concord; ripens ten days before Hartford. Strong, 2 years, 25 cts. each, \$2 for 10.

Worden. Bunches large, handsome; berries large, sweet. Ten days earlier than Concord, and superior to it in flavor; ripens well in cold localities. Contains very little pulp and is very juicy, making it a most valuable variety for growing for wine or grape-juice. Vine grows strong and vigorously, with large foliage. Strong, 2 years, 25 cts. each, \$2 for 10.

RED GRAPES

Agawam (Rogers' No. 15). Dark red or maroon; bunches compact, very large; berries large, oval; pulp soft; flavor sweet and aromatic. Ripens early; is very attractive. One of the best of the red varieties. Strong, 2 years, 25 cts. each, \$2 for 10.

Brighton. One of the most desirable of the early red Grapes. Very large and handsome, Clusters under favorable conditions are more uniform than those of any other Grape. Strong, 2 years, 25 cts. each, \$2 for 10.

Delaware. Superior as a table Grape. Bunch medium, very compact; berries medium round; skin thin, of a beautiful dark red when fully ripe; flesh tender and juicy, exceedingly sweet. Strong, 2 years, 30 cts. each, \$2.50 for 10.

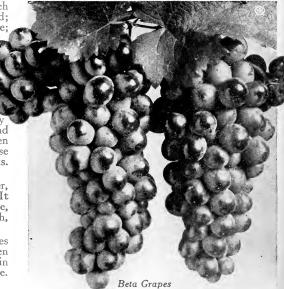

WHITE GRAPES

Campbell's Early Grapes

Green Mountain (Winchell). Found growing in a garden on the side of the Green Mountains in Vermont, at an altitude of 1,400 feet, where it ripened its fruit perfectly Vine strong, vigorous, healthy, very hardy and productive. Bunch long, compact shoulder, green or greenish white. Always a favorite with those who prefer white Grapes. Strong, 2 years, 40 cts. each, \$3 for 10.

Moore's Diamond. Vine is a vigorous grower, with large, dark, healthy foliage, very hardy. It is a prolific bearer, producing large, handsome, compact bunches. Strong, 2 years, 25 cts. each, \$2 for 10.

Niagara. Vine hardy and strong grower; bunches very large and compact, many weighing fourteen ounces, sometimes more; berries large, skin thin but tough. The most popular white Grape. Strong, 2 years, 25 cts. each, \$2 for 10.

SAINT PAUL, MINN.

Perfection Currants

CURRANTS

A popular and profitable crop in a variety of soils. Its principal insect enemy, the currant worm, is easily kept in check by the liberal use of hellebore, applied immediately upon the first appearance of the worm. Plant 4 feet or more apart.

Prices, except where noted, strong, 2 years, 25 cts. each, \$2 for 10, \$6 per 100; extra strong, 50 cts. each

Perfection, New. The color is a beautiful bright red; size as large as or larger than the Fay, the clusters averaging longer. A great bearer, resembling its parent, the White Grape, in this respect. The quality is rich, mild, subacid, plenty of pulp, with few seeds. After three years' trial, this fruit was the first to receive the \$50 Gold Medal of the Western New York Horticultural Society. Strong, 2 years, 40 cts. each, \$3.50 for 10.

Black Naples. Very large; black; bunches of medium length. Much valued for jellies. Strong grower and coarse leaves.

Cherry. Fruit of the largest size, deep red, rather acid; short bunches; growth strong, stout, erect; short-jointed shoots.

Fay's Prolific. This Current has been widely planted and has given general satisfaction, and is one of the best red Currents known. Fruit very large, bright red and of excellent flavor; enormously productive.

Long-Bunch Holland. One of the best late varieties; bush very vigorous and hardy; clusters very long; berries medium to large, bright red and good quality.

Victoria. Large; bright red; long bunch; late in ripening and hangs long on the bush. One of the best; very valuable for its lateness.

White Grape. Very large; yellowish white, sweet, or a very mild acid; excellent quality and valuable for the table. The finest of the white sorts.

GOOSEBERRIES

Gooseberries thrive well on a variety of soils, if well drained and fertile. The cultivation should be thorough early in the season.

European varieties are of large size and various colors. The green fruit is sent to the early markets and is profitable. The best American Gooseberries are superior to European sorts in productiveness, hardiness, quality and freedom from mildew; the curse of European varieties and their seedlings is mildew.

Downing. (American.) "The standard of excellence." Large, pale green and covered with a white bloom; best in flavor and quality; a strong grower, productive and healthy; valuable for market. Strong, 2 years, 25 cts. each, \$2 for 10, \$12 per 100.

Houghton. (American.) Fruit medium size, red, thin-skinned, juicy, sweet and good in flavor and quality. Very productive. Strong, 2 years, 25 cts. each, \$2 for 10, \$10 per 100.

Industry. (European.) Bush a strong grower, and the most productive of European varieties; fruit large, dark red, mild, subacid, sweet and good flavor; one of the best for market, either green or ripe. Less subject to mildew than the others. Strong, 2 years, 40 cts. each, \$3.50 for 10.

Josselyn. (American.) Good grower, fine foliage and a very profitable fruiter, when compared with any other Gooseberry in existence. The freest of all Gooseberries from mildew, both in leaf and fruit. Strong, 2 years, 30 cts. each, \$2.50 for 10, \$15 per 100.

Keepsake. (European.) The blossoms of this variety are well protected by foliage, so that it is sure to set good crops in any ordinary year. The fruit is very large, pale yellow, of good flavor. Strong, 2 years, 40 cts. each, \$3.50 for 10.

Pearl. (American.) The most prolific Gooseberry known. One bush produced 2,500 berries. It is free from mildew and is larger than the Downing. The skin is strong and makes the berry excellent for shipping. A splendid variety for preserving, and is strongly recommended for pies and sauces. The color is light green and quality first class. Strong, 2 years, 30 cts. each, \$2.50 for 10, \$15 per 100.

Josselyn Gooseberries

THE PARK NURSERIES

RASPBERRIES

For field culture, Raspberries should be planted in rows 4 to 6 feet apart, $2\frac{1}{2}$ to 3 feet in rows, depending on the character of growth of sorts planted.

The first year after planting cut the canes about 2 inches from the ground, and when grown 18 inches pinch off the ends, which will cause them to branch; repeat this when a new growth comes, to make stocky plants. The following spring shear off a third of the wood, leaving a round bush.

Strong plants, 15 cts. each, \$1 for 10, \$3 per 100, except as noted

RED AND PURPLE RASPBERRIES

Columbian. A new variety of great promise. It is a very vigorous grower and very hardy. Fruit purple and delicious for table or canning.

Cuthbert, or Queen of the Market. Fruit is large, luscious, and produced in the greatest profusion. Color deep rich crimson; fruit very firm.

King. This is the best bright red variety under cultivation. It is also the hardiest and least affected by cold of the Raspberry family. Fruit of high quality. Fine for market and home use.

Loudon. A new red Raspberry which originated at Janesville, Wis. Large, broadly conical; beautiful red. Ripens about with Cuthbert, continuing later, and in quality better than that variety. One of the best.

St. Regis. Raspberries for four months! That's what you get when you plant St. Regis, the new everbearing variety. Moreover, they are not only Raspberries, but Raspberries of the very highest grade—in size, in brilliant crimson color, in firmness, in flavor. This has been aptly termed the "early-till-late" variety for it is the first red Raspberry to give ripe fruit, while it continues to produce berries without intermission until late in October. 15 cts. each, \$1.25 for 10, \$5 per 100.

YELLOW RASPBERRY

Golden Queen. Large size, great beauty, high quality, perfectly hardy and very productive. Ripens in midseason. No home garden should be without it.

BLACK RASPBERRIES

Cumberland. The bush is hardy, a vigorous grower, and exceptionally productive. Fruit of uniform size, and larger than any known black Raspberry. Many specimens are from 1/8 to 15/15 of an inch in diameter. In quality it is equal to Gregg, ripening a few days earlier.

Gregg. A hardy blackcap; one of the best market Raspberries grown. Very productive, the yield under good cultivation is enormous. Berries very large; quality good, firm in shipping.

Kansas. Strong, vigorous grower, standing extremes of drought and cold, and bearing immense, early crops. Berries size of Gregg and of better color; jet-black, of best quality; presents a handsome appearance and commands highest price in market.

BLACKBERRIES

The ideal crop for obtaining money returns from poor lands. Yet the cultivation of the vines should not be neglected, and liberal fertilizing should be accorded. Mulching is of great advantage, especially in poor soils. Plant in rows 6 feet apart, the plants 3 feet apart in the rows. Trim with a view to obtaining a crop of excellent berries from a few strong shoots to a plant rather than from many weak ones.

Strong plants, 15c. each, \$1 for 10, \$3 per 100, except Lucretia Ancient Briton. This has proved one of the most profitable fruits for market growing. Plant hardy and very

productive; fruit large and sweet.

Eldorado. New. This splendid variety is, perhaps, the best ever introduced. It stands when other varieties are winter-killed, and has never failed to produce enormous crops of its large, jet-black fruit, sweet and melting.

Snyder. One of the hardiest and best-known sorts grown in the West. Fruit large and of good quality. Early. Stone's Hardy. Ripens a little later than Snyder and is

very hardy.

Lucretia Dewberry. In size and quality this low-growing or trailing Blackberry equals any of the upright sorts. Its berries ripen before raspberries are gone, are large, soft, sweet and luscious throughout, with no hard core. May be grown over walls, trellises or rocky slopes, where there is no room for other berries. Strong plants, 15 cts. each, \$1 for 10, \$4 per 100.

Eldorado Blackberries

STRAWBERRIES

The Strawberry will grow in any good garden soil where the ground has been thoroughly prepared. For family use plant 1 foot apart in the row, the rows 4 feet apart, allowing only enough runners to grow so as to form a bed 3 feet wide. Cover the plants lightly in winter with leaves or litter, which should

Those marked P have imperfect flowers and must be planted near the perfect-flowered kinds to insure

fertilization.

EVERBEARING STRAWBERRIES

\$1 per doz., \$4 per 100

Americus. One of the best of the midsummer are fall bearers. All through August, September and October the vines are filled with ripe berries.

Forward. Fruit large, firm; dark red; round in form and never misshaped; best quality. Fruits from June to November. The best we have found, and the best in cultivation. \$2 per doz. \$10 per 100.

Progressive. This variety has been tried for a number of years, and found to be one of the most productive. Fruits heavily in August and September, bearing an abundance of Strawberries out of the regular season.

Senator Dunlap Strawberries

A typical plant of Everbearing Strawberry

STANDARD STRAWBERRIES

Strong plants, 50 cts. per doz., \$2 per 100, \$7 per 1,000 Brandywine. One of the very best which has been fully tested. Growth strong and healthy, and fruit large; medium to late.

Minnesota No. 3. A new variety, said to be supering to Senator Dunlap. A heavier yielder, brigh-glossy red, very large. \$1 per doz., \$3 per 100.

Senator Dunlap. A large, regular and attractive berry, deep red, and exceedingly firm in substance and excellent in quality. One of the very early sorts and continues in bearing nearly a month.

Warfield. P. Great beauty, firmness, earliness, productiveness and vigor make this berry most popular. Superseding other varieties for canning, distant shipments and general marketing.

Wm. Belt. Berries very large, conical, bright red, of good flavor. Very fruitful. Medium to late.

VEGETABLE ROOTS

Borders and beds of these plants are common in many gardens; they are usually weedy and neglected. A better way to grow both family and market crops is to set the roots 15 to 18 inches apart in rows. Spread the roots of Asparagus out well, firm the soil about them and leave the crowns about 2 inches below the surface of the soil.

ASPARAGUS

Strong, 2-year roots, 50 cts. per doz., \$2.50 per 100

Columbian Mammoth White. Produces numbers of great, thick, white shoots. Most attractive and profitable for canning.

Conover's Colossal. Really colossal, deep green shoots, from 1 to 2 inches in diameter, are sent up thickly from the crowns.

Palmetto. In great markets this Asparagus sells at top prices, on account of the great size and beautiful appearance of its stalks.

RHUBARB, or PIE-PLANT

Strong roots, 25 cts. each, \$2 for 10, \$15 per 100

Linnæus. Leaf-stalks large, tender, juicy; produced quite early. Queen. The extra-large, tender stalks are a decided pink color, and delicious for canning or cooking. A very strong-growing sort.

HORSE-RADISH

Those having compared the freshly dug to that already prepared can appreciate its value. 50 cts. per doz., \$4 per 100.

MINT

The well-known garden Mint for sauces and seasoning. \$1 per doz.

Asparagus

Our retail store, "The Home of Flowers," is one of the largest establishments in the United States

The Home of Flowers

Our Flower Department

LOWERS are the Most Beautiful Gift of Nature, and appeal alike to people of wealth and culture as well as to those who are not so favorably situated. Everybody loves flowers. The proper arrangement of flowers is a study in itself, quite distinct from the growing of them. Many a good florist can grow flowers to perfection, but is unable to arrange them to give the best effect. It is our constant aim and study to properly arrange flowers so that they will be shown to the best possible advantage. By long experience, and studying color combina-

tions and arrangements, it has become an art with us, and we are always pleased to give our customers the benefit of our experience. A diamond set in a lead ring would still be a diamond, but its chief charm would be lost by its unsuitable surroundings. So with flowers—the chief charm can be completely lost by inharmonious arrangements.

Our Store is the largest cut-flower store in America, and the best equipped west of New York City. Its dimensions are 50 by 150 feet, with a basement of the same size. In connection with the store we have a conservatory 50 by 60 feet, for displaying decorative and flowering plants, and an office 30 by 30 feet. Our store is open during the week from 7 a.m. to 8 p.m.; on Sundays and holidays from 8 a.m. to 1 p m. We can be reached by telephone or telegraph night or day, and can ship promptly on any train wanted.

Every Variety of Cut-Flowers known to the trade is handled by us in season, and a force of twenty-five clerks is kept busy attending to customers and filling orders. In the shipping department, only the best and most approved methods are employed. Old stock is never shipped out; only fresh-cut blooms are used for shipping purposes. All express shipments are taken direct by our messengers to the depot, the train time on all labels being plainly marked. By long experience we have learned just how to pack flowers so they will reach their destination in the best possible condition, no matter whether it be in the coldest days of winter or the hottest days of summer. We ship to all parts of the country adjacent to St. Paul, our territory including western and northern Wisconsin, northern Michigan, Minnesota, North Dakota, eastern Montana, South Dakota, and northern Iowa, while quite frequently we ship to more distant points in Illinois, Michigan, Missouri and Nebraska, as well as to Manitoba, Alberta and Saskatchewan.

We Do Not Recommend Sending Flowers by Parcel Post, as the mails are too uncertain. Where customers wish flowers shipped by parcel post, we will pack them in the best possible manner and deliver to the post office in good condition, but will not be responsible for their arrival at destination. We always recommend shipping by express, and will send in that manner unless otherwise requested.

devoted to the distribution of cut-flowers for all purposes, and all kinds of plants for home adornment

Bridal Flowers

Bouquets for brides and attendants are made up in a variety of ways and with a great assortment of flowers. We issue a special catalogue of these bouquets, which we shall be pleased to mail on request. Our long experience and our expert artists in this department enable us to put out the latest creations for bridal parties.

Party and Reception Flowers

We employ a large corps of experienced clerks, who study the wants of our patrons and the latest styles in flowers and bouquets. Our party bouquets are up-to-date productions in the flower-world, and are carefully arranged, whether the order is large or small.

Funeral Flowers

We make a specialty of lodge emblems and designs, such as Masonic, Odd Fellows, Workmen, etc. Many of the beautiful floral emblems seen at the funerals of prominent citizens in the Northwest have been designed by us. We make any desired emblem on short notice, and guarantee satisfaction. We keep a complete stock of wire frames for this purpose at all times.

Flowers Delivered Anywhere at Any Time

Through The Florists' Telegraph Association (a mutual arrangement with the leading florists of the country), we are enabled to deliver flowers in all the leading cities of the country, and also in any town where there is an express office, on short notice. Where time will permit, letters can be written with no extra expense to the customer; but where time does not permit, telegrams will be sent at the expense of the customer. "Night letters" are recommended for this purpose, as fifty words can be sent for the regular day rate for ten words, so that the expense is trifling. Our customers who wish to surprise and please their friends in distant cities, or on board steamships about to sail, can rely on their orders being executed promptly and in the best possible manner.

Price-Lists

Monthly price-lists of loose flowers are issued throughout the year, as prices and varieties vary from season to season. Complete price-lists of funeral designs, wedding flowers, party flowers, etc., can be had on application. In writing for one of these price-lists, be sure to state definitely which one you desire. Where time will not permit of correspondence, kindly state the purpose for which flowers are intended, and the price you wish to pay, and your order will be filled with the best flowers possible and in the most up-to-date manner.

IMPORTANT to Flower-buyers. There are no mail deliveries (except special delivery letters) in St. Paul on Sundays or bolidays. Persons sending mail orders to reach us on those days should attach Special Delivery stamps to their letters and thus avoid disappointment and delay. If there is any doubt about your letter reaching us in time, you had better telegraph or telephone.

Interior of sun-parlor, showing decorative plants and appropriate furniture

DECORATIVE PLANTS

E DESIRE to state the fact that, while we are nurserymen and landscape architects, we are

also florists, having the largest ranges of glass in the Northwest, and the largest and most attractive retail flower-store in America—known everywhere as "The Home of Flowers." Large quantities of decorative plants are grown and imported by us. We supply them in all sizes, from the smallest to the largest. With plants we can furnish all necessary decorations in vases, boxes, pedestals, jardinières, fancy and ornamental baskets—in fact, everything for the decoration of sun-parlors, piazzas, lawns, and interiors of homes or buildings. Our Palms, Ferns, Araucarias, Rubber Plants, etc., are unsurpassed in the

Twin Cities. We shall be pleased to have you inspect our stock. We do not offer plants to send by mail. Our stock is large and select, giving immediate results, and we pack carefully and ship by express.

Araucaria excelsa

DECORATIVE FLOWERING PLANTS FOR EASTER

These are listed in our special Easter price-list sent on application. We have a full line of all seasonable stock, such as Azaleas \$3 and up, Hydrangeas \$2 and up, Rhododendrons \$5 and up, Scotch Heather \$1 and up, Spirea \$1 and up, Lilac \$3 and up, Easter Lilies, Hyacinths, Tulips, We also have a large and choice stock of Roses in full bloom for the Easter holiday, consisting of all varieties of Ramblers at prices ranging from \$1 and up. All of these Roses are perfectly hardy. They can be planted in the open ground and will bloom again during the summer. All of the above-named plants are grown in pots and will be in prime condition—at their best for Easter.

Aralia elegantissima. Handsome plants for the warm conservatory and for exhibition purposes. \$2 each.

Araucaria excelsa (Norfolk Island Pine). The most beautiful of all tender evergreens, admirably adapted to house culture, as it is not affected by gas or dust. Its deep green, feathery foliage is arranged in whorls rising one above the other at regular distances. \$2 to \$4.

Asparagus plumosus nanus (Lace Fern). Graceful climbing Asparagus, with beautiful, bright green feathery foliage. 25 cts. to \$1.

A. Sprengeri. Has coarser foliage than Plumosus, and

grows in long, exceedingly graceful sprays of rich green. Valuable as a decorative plant. 25 cts. to \$1.

Hydrangeas in tubs give a wonderful touch of beauty to the home (see page 80)

HANDSOME HOUSE FERNS

Adiantum Croweanum. The hardiest Maidenhair Fern for home culture. Its peculiar, broad leaves and thin, wiry stems create an effect not possible with other sorts of ferns. 25 cts. to \$3 each.

Bird's Nest Fern. Fine, glossy, undivided fronds, which grow in a whorl, and form a nest-shaped center,

which gives it its popular name. \$1 to \$5.

Boston Fern. This variety has proved immensely popular as a house plant, on account of its graceful, robust habit and splendid durability. 50 cts., 75 cts., \$1, \$1.50, \$2, \$3 and \$5.

Cibotium Schiedei. A very valuable Fern, with graceful, drooping light green fronds. One of the most

desirable of the valuable Tree Ferns in cultivation. S10 to S20.

Glory Fern. An easy-growing form of that most beautiful of all Maidenhairs, Adiantum Farleyense, which on account of its special requirements in atmospheric and temperature conditions, has been limited in its cultivation to specialists. This new variety, which is identical in every particular, has a stronger

constitution and makes a most delightful house plant. \$1 to \$3. Holly Fern. Broad, dark, glossy green foliage; very ornamental, and quite different from other house plants. 15 cts. to \$2.

Holly Fern, Crested. Next to the Boston Ferns, the Holly Fern is the most satisfactory for apartment use, and this variety has made a place for itself in the first rank as a decorative plant. Its foliage is of rich, glossy, dark green; the pinnæ, or leaflets, besides being wavy or undulated on the edges, are also deeply cut or toothed, giving the plant a graceful and light appearance. 25 cts., 50 cts., \$1, \$1.50 and \$2.

Roosevelt. A new type of the Boston Fern, but grows more compact and is a great favorite. Its fresh green fronds are very graceful. \$1, \$1.50, \$2, \$3, and \$5.

Whitmanii. The Ostrich-Plume Fern, with finely divided, feathery fronds. \$1.50, \$2, \$3, and \$5.

Miniature Ferns. In all the choicest varieties for Fern-dishes. 15 cts. each, \$1.50 per doz., and 25 cts. each, \$2.50 per doz.

Our collection of Ferns is one of the largest in this country, and we can furnish nearly any variety in various sizes.

Roosevelt Fern

ENGLISH IVY. This we consider the finest climber for growing indoors. Foliage is always a bright glossy green not affected by insects. It is a clean rapid grower and withstands changes in temperature better than any other climber we are acquainted with. 50 cts., \$1, \$2, and \$3.

PRIMULA obconica. A beautiful house plant with dark green, leathery leaves, and bright flowers on strong stiff stalks held well above the foliage. Blooms throughout the season and is preferred to the Chinese Primroses, which have a shorter blooming season. 75 cts. and \$1.

Whitman's Fern

HOLM & OLSON, INC.

DECORATIVE PLANTS, continued

ASPIDISTRA variegata. Foliage striped with white. A charming variegated plant; no two leaves alike. Will stand all sorts of neglect and abuse and grow rapidly. \$2 to \$5_

CYPERUS (Umbrella Plant). An excellent plant for the house. Will thrive in any good soil and always presents a green and attractive appearance. It may be grown as subaquatic, and in any case should never lack a liberal supply of water. 50 cts. and 75 cts.

DRACÆNA indivisa. Long, graceful foliage; extensively used in vases. Stands full sun exposure and grows very vigorously, its long, slender foliage setting off other plants. 75 cts. to \$2.

D. terminalis. Brilliant crimson foliage, suffused and marked with pink. One of the most beautiful pot-plants for home adornment. Grows rapidly. \$1 to \$1.50.

FICUS (Rubber Plant). The well-known India Rubber Plant; nothing better for room decorations. Its dark green, shiny foliage is always handsome, and it withstands excessive heat and dryness without injury. 75 cts. to \$2.50.

SNAKE PLANT (Sansevieria). An elegant variegated plant, especially adapted for house decoration, the thick, leathery leaves standing the heat and dust of the house with impunity. 75 cts. to \$3 each.

Aspidistra variegata

DISTINCTIVE PALMS

Cocos Weddelliana. The most graceful of the smaller-growing Palms. Admirable for fern-dishes and table decorations, growing well in warm rooms. 35 cts. to \$1.50.

Kentia Belmoreana. The Kentias are the hardiest Palms. They are of slow growth and are less affected by the dust and dry atmosphere of the house than any others. This variety is of a dwarf, spreading habit with fine rich foliage. \$1, \$1.50, \$2, \$3, \$5, \$7.50, and \$10. Large specimens in tubs. Prices will be quoted on application.

Kentia Forsteriana. This splendid variety is very similar to Belmoreana, but is of stronger growth and broader, heavier foliage. \$1, \$1.50, \$2, \$3, \$5, \$7.50, and \$10. Large specimens, prices on application.

Phœnix Rœbelenii. This beautiful Palm, certainly the most graceful of all the Palm family, was discovered in China a few years ago. The plant is of vigorous growth, and as hardy as a Kentia. Exceedingly admirable as a house plant. \$3 to \$4. Specimens, \$25 to \$50.

HYDRANGEA HORTENSIS OTAKSA

This type of Hydrangea is used for porch-steps, or it can be set along walks, drives, etc. It is not hardy and must be kept in tubs, which can be placed in large vases, and there is nothing quite so effective for decorative effect, as the blooming season extends through most of the summer. After through blooming, cut back and set tubs away in a cool part of the cellar. In the spring, when the weather begins to warm, give a good soaking of water and continue watering freely

until they start to grow.

This is the variety that is used so extensively at the Atlantic seashore resorts, producing immense heads of flowers, usually pink in color, throughout the entire summer. We have a grand lot of plants specially prepared for summer flowering that will make a handsome display. Specimens in tubs, \$3 to \$10.

Phænix Ræbelenii

HANGING-BASKETS

For a beautiful and artistic effect, nothing equals a well-filled basket of Ferns and other decorative plants. Baskets filled with these grow more beautiful each week, and are more satisfactory than with blooming plants. We fill these baskets with plants from our own houses; they are "quality" in every way. \$3, \$4, \$5, \$7.50, and \$10.

Palm, Kentia Belmoreana

Bush-form Box

BAY AND BOX TREES

OR decorative purposes, these stately evergreens have attained great popularity. Every formal garden—Colonial or Italian and every home or building constructed along classic lines, requires the Bay and the Box to complete their dignified settings. Adapted for roofgardens, hotel and theater foyers, store openings, and large halls for public gatherings, wherever formal decorations can be introduced effectively. The trees withstand cold to the frost-point, and dust and darkness.

Years of careful training in Europe have developed our very choice specimens, shaped in standard and pyramidal forms. We are pleased to suggest suitable

settings to our customers.

War Note. The trees on this page are products of Holland and Belgium, and as this catalogue goes to

press two months before date of shipping to the United States, there is an uncertainty about our being able to make delivery until April 1.

BAY TREES (Laurus nobilis)

Purchasers desiring fine, well-shaped Bay trees at reasonable prices will do well to investigate or examine our stock, as we are the largest importers in the Northwest, and we have in stock at all times good qualities of all sizes including extralarge specimens.

Pyramidal Box Tree

BOX TREES

These plants are sheared in compact, pyramidal and globe forms, and make very beautiful specimens. Box trees are desirable for the same purposes as the Bay trees, while not so expensive. Nothing is better for the open porch and formal garden, planted either in tubs or the open ground.

BEDDING PLANTS

The plants which we offer have been grown in our own greenhouses for our retail customers, have been given plenty of room, have been transplanted frequently, and are strong, bushy, well-rooted stock that will transplant readily to the open ground without check to their growth. These plants should not be confused with the small, inferior, poorly grown plants offered by catalogue seed houses, as they bear no com-

All plants under this heading will be shipped separately by express. In some instances we can combine tender-plant orders with hardy nursery stock and ship all together, thus saving express charges. But as these tender plants should not be planted out in this section until May 15 or 20, and as it is always advisable to ship dormant nursery stock promptly, it must be understood that we will use our best judgment in shipping and send these tender plants when we consider it safe and advisable to do so.

Full and complete list of Bedding Plants ready May 1

Abutilon (Flowering Maple). White, yellow, pink. 20 cts. each, \$2 per doz. A., Variegated. 10 cts. each, \$1 per doz.

A., Trailing. Fine for window boxes and hanging baskets. 15 cts. each, \$1.50 per doz.

Acalypha. Reddish bronze foliage. 25 cts. each, \$2.50 per doz.

Achyranthes. Red-and-white leaves. \$1 per doz., \$8 per 100.

Ageratum, Blue Perfection. Bright blue. 10 cts. each, \$1 per doz., \$8 per 100.

Alternanthera. Dainty foliage plant for carpet bedding. 60 cts. per doz., \$4 per 100.

Alyssum, Little Gem. Dwarf; for edging. 75 cts. per doz., \$6 per 100.

Antirrhinum (Snapdragon). Pink, white, red, yellow. 60 cts. per doz., \$4 per 100.

Asters. One of the most popular flowering plants. Strong seedlings. 25 cts. per doz., \$2 per 100.

V., Green. 30 cts. each, S3 per doz. Zinnias. Popular summer-flowering annuals. 50 cts. per doz., \$4 per 100.

Large-flowering, Fringed Petunias

HOLM & OLSON, INC.

Our strong-growing Cannas will soon form a bed like this

CANNAS

We call attention to our fine stock of Cannas—offered in best varieties, grown in 4-inch pots, 12 to 18 inches high, ready to plant, and saving much time. All our stock is grown in this way. We make a specialty of choice bedding plants, and beg to refer to thousands of the most beautiful lawns in the Twin Cities and other cities in the Northwest, where our plants are used.

Beacon. 4 to 4½ feet. Green foliage. Moderatesized flowers of rich cardinal, in great masses. A striking variety for bedding.

Brilliant. 4 feet. Green foliage. Pure golden yellow flowers with two curling petals of fiery red.

Buttercup. 3 feet. Green foliage. Flowers pure buttercup-yellow. The best yellow Canna in existence.

Eureka. 4 feet. The best white-flowering variety. The immense trusses of substantial flowers are borne upon very vigorous plants in the greatest profusion. 40 cts. each, \$4 per doz.

Express. 2½ feet. Green foliage. Flowers bright scarlet-crimson. Excellent for bordering.

Feuermeer. 3½ to 4 feet. A brilliant fiery scarlet, of medium size. Exceptionally free flowering and very effective for massing.

Firebird. 3 feet. A remarkable Canna with perfectly formed flower, 7 to 8 inches in diameter, of a brilliant cardinal-red. The foliage is heavy and beautiful. Requires rich soil for best results. 40 cts. each, \$4 per doz.

General Merkel. 3½ to 4 feet. A brilliant scarlet suffused with orange, the base and the edge of the petals marbled golden yellow.

Gladiator. 5 feet. Green foliage. Flowers intense yellow, spotted with bright red. This is one of the most remarkable varieties we have ever introduced. 50 cts. each, \$5 per doz.

Gustav Gumpper. 3 to 4 feet. Ideal rich yellow bedding Canna. Fine trusses of large flowers held well above the foliage.

Hungaria. 3½ feet. Green foliage. Flowers large and borne in trusses of enormous size, well above the foliage. Color is La France pink, with satiny sheen. 40 cts. each, \$4 per doz.

King Humbert. 4 feet. Bronze foliage, with brownish green stripes, large, thick, and leathery. Flowers large; bright orange-scarlet, streaked with crimson.

Koros. 4 feet. Bronze foliage. An attractive shade of orange-scarlet streaked and dotted with carmine.

Louis Reverchon. 4 to 4½ feet. Very dark foliage. Blooms of immense size and cochineal-red color. Very effective.

Madame Crozy. 3½ feet. The popular golden edged scarlet.

Maros. Before the introduction of Eureka this was considered the best white Canna. It is very free flowering and projects its trusses of creamy white flowers high above the foliage.

Meteor. (Wintzer's.) 5 feet. Green foliage. One of the most brilliant Cannas, of a rich, glowing, deep crimson. Each plant produces five or six trusses of bloom, which flower constantly all summer. Undoubtedly our best red, and one that will always be in the front rank. 40 cts. each, \$4 per doz.

Mrs. Alfred Conard. 4 feet. Large, exquisitely shaded salmon-pink flowers produced in great abundance on robust, upright plants. 40 cts. each, \$4 per doz.

Mrs. Woodrow Wilson. A rich but soft crimsonpink, with very large flowers, made up of broad overlapping petals. A robust grower and free bloomer. 75 cts. each, \$7.50 per doz.

Souvenir d'Antoine Crozy. 3 feet. Green foliage. Beautiful red, bordered with golden yellow. Very popular.

Venus. 3½ to 4 feet. Soft rosy pink with a pretty mottled border of creamy yellow.

Wyoming. 7 feet. Purple foliage. One of the most majestic Cannas. Blossoms orange-colored, true orchid-shape, with large, rounded petals that flutter in the breeze like silken flags.

Yellow King Humbert (Queen Helen). This variety has all the good qualities of the old King Humbert. It is a strong grower and blooms very freely, the flowers being bright yellow dotted red. 50 cts. each, \$5 per doz.

Prices of Cannas, unless otherwise noted, 30 cts. each, \$3 per doz.

SAINT PAUL, MINN.

Cactus Dablia

Decorative Dublia

DAHLIAS

Cultural Notes .- Select a well-drained position, where they will receive the benefit of the sun the greater part of the day. As to soil, they are not so particular, except that it should not contain too much clay; should such be the case, add coarse sand or coal-ashes. application of fertilizer added. Stable manure is the best.

The planting of dormant bulbs in this vicinity should be about May 15 to 25. Green or growing plants

should not be set until after all danger of frost is over, which is about May 25.

Special List. About April 1 we shall issue a Special List of Dahlias, which will include the best new sorts and the desirable standards. Our collection of Dahlias is the largest ever offered in the West.

CACTUS DAHLIAS

This type of Dahlia is characterized by long, narrow, pointed and twisted petals, giving the layered flower a very striking appearance.

Countess of Lonsdale. Pleasing blending of salmon-pink and amber. Free blooming.

Dainty. Lemon-yellow center, tipped rose-pink. Floradora. Blood-red; a remarkably free bloomer. Forbes Robertson. Beautiful reddish orange. Long, straight, star-shaped petals and a profusion of thread-like petals intermingling with main florets. Kalif. A mammoth pure scarlet flower, specimens measuring over 9 inches in diameter. \$1 each.

Kriemhilde. Brilliant pink, shading to white. Mars. Deep orange-scarlet; free flowering; fine form. Master Carl. Bright amber; perfect flower.

Strahlen Krone. Intense cardinal-red.
Success. Pure yellow with long twisted petals.
Sunset. Yellow at base, shading to bright apricot. Any of the above varieties, 30 cts. each, \$3 per doz., \$20 per 100, except as noted. One each of the above for \$3.

SHOW DAHLIAS

The following have the large, round, full-flowered characteristics of the Show class. They are either solid colors, edged or tipped lighter or darker.

A. D. Livoni. Fine clear pink; free flowering and perfect form. 25 cts. each, \$2.50 per doz.

Grand Duke Alexis. Ivory-white; large, massive flower, tinted rose. 25 cts. each, \$2.50 per doz. Merlin. A beautiful orange-scarlet; free flowering;

good for cutting. 25 cts. each, \$2.50 per doz.

Queen Victoria. Bright canary-yellow. 20 cts.
each, \$2 per doz.

Red Hussar. Cardinal-red; 20 cts. each, \$2 per doz. Storm King. Very early; profuse bloomer and one of the best whites. 20 cts. each, \$2 per doz. Stradella. Rich, deep, purplish crimson; long stems; very free flowering. 25c. ea., \$2.50 per doz. W. L. Austin. Fawn color. 25c. ea., \$2.50 per doz.

One each of the above eight varieties for \$1.50

DECORATIVE DAHLIAS

This class comprises those that depart from the formal rounded type of the Show class, but do not have the twisted petals of the Cactus type.

C. W. Bruton. Bright yellow; one of the best. 20 cts. each, \$2 per doz.

Hortulanus Fiet. A colossal-flowered variety from Holland. Blooms over 8 inches in diameter, of the most delicate shade of shrimp-pink, the tip of each petal barely touched with gold. 75 ets. each. Jack Rose. Brilliant crimson-red. 25 ets. each,

\$2.50 per doz.

Mina Burgle. A rich, luminous, dark scarlet, on long stiff stems. Splendid both for cutting and garden decoration; a very free-flowering sort. 50 cts. each, S5 per doz.

Mont Blanc. An early, free, continuous-flowering creamy white on good stiff stems. 20 cts. each,

\$2 per doz.

Souvenir de Gustave Doazon. Brilliant orange-scarlet; free bloomer. 25 cts. each, \$2.50 per doz. Sylvia. Soft pink center, shading to white; fine for cutting. 20 cts. each, \$2 per doz.

Wm. Agnew. A rich, dazzling carmine-red. 20 cts.

each, \$2 per doz.

One each of the above eight varieties for \$2

NEW CENTURY SINGLE DAHLIAS

These are of the free-branching habit, flowering early and profusely throughout the season. Flowers 4 to 6 inches across, on long stems.

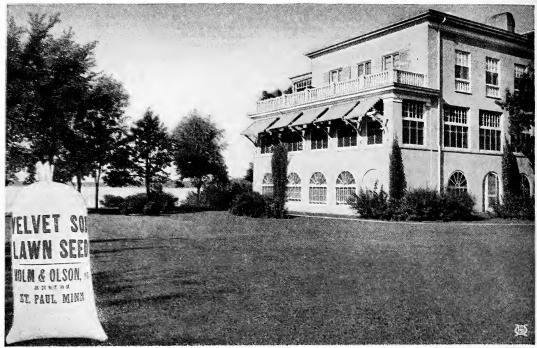

Scarlet Century. Brilliant scarlet.

Twentieth Century. Rosy crimson, the flowers change lighter as the season advances.

Price of the above Single Dahlias, 25 cts. each, \$2.50 per doz.

DAHLIAS IN FINE MIXTURE

Comprising many of the very best varieties. 15 cts. each, \$1.50 per doz., \$10 per 100.

This splendid lawn was made by the H. & O. Service-engineering, grading, and seeding with Velvet-Sod mixture

VELVET-SOD LAWN SEED

NE of the most essential parts of the country place and suburban home is a properly made and well-kept lawn. We have made careful study of the grasses required for best results, and the formulas of our various grass mixtures are based upon these experiments.

The days of laboriously making lawns from sod are rapidly passing away. Good lawns are now made from good grass seed—the essentials are a careful blending of varieties adapted to producing a thick turf with velvety appearance. Each variety in this composition has a special purpose; some make strong, fibrous roots, that take hold on the earth and hold it in position; others, of a creeping nature, quickly fill up the vacant spots;

yet other sorts are used for their color value, besides kinds that are able to withstand heavy or excessive rains. Our Velvet-Sod Mixture is composed of the best, strictly pure seeds of hardy lawn grasses from America and Europe. It quickly produces a permanent lawn of rich green and luxuriant growth. If you need grass seed for only a small city yard, or a large lawn of acres, use this mixture.

The preparation of soil must be thorough before seeding. Either plow or spade so that every foot of earth is stirred; then smooth until a perfect grade is secured and the soil well pulverized. If not rich, it should be fertilized in advance of seeding. Work the fertilizer thoroughly into the soil, so it will not require additional enriching for several years.

Seeding should be done when the wind is quiet—usually in the early morning. Select a day, if possible, just before a rain, if water is not at hand. A good plan is to cross-seed, so that no spots will be missed. After sowing, rake the seed into the soil lightly, and roll evenly.

QUANTITY OF SEED TO SOW.—One pound of our lawn grass seed will sow 10 x 20 feet, or 200 square feet. This is heavier than recommended by many seedsmen, but practical experience in making lawns in our landscape department has taught us to use sufficient seed, and the best that can be obtained.

VELVET-SOD MIXTURE

Our Velvet-Sod Mixture will make a close, thick turf in a very few weeks. The seed roots deeply, enabling the lawn to withstand severe drought, and maintaining its beautiful, rich green the entire season. This mixture is no doubt the cheapest lawn seed offered, not on account of the price, but more on the point of high quality and quantity of actual seed to the bushel, which contains twenty pounds of the best kinds and varieties of grasses used for lawn purposes. We know our mixture to be among the best on the market, and we ask our patrons to carefully consider this before placing their order. The weight of this mixture shows its extra-high

quality, and it is entirely free from chaff of every kind. Our practical experience as landscape gardeners has taught us the best Lawn Grass Mixture for parks, cemeteries and private grounds. Lb. 35 cts., 5 lbs. \$1.75, 10 lbs. \$3.25, bus. (20 lbs.) \$6

CAPITAL CITY MIXTURE

This mixture is admirably adapted to all uses, but the quality of the seed is not so high as our Velvet-Sod Mixture; but, for ordinary sowing, will answer the same purpose, and we know it is equal to any other mixture on the market. It will make a close, beautiful sward in a short time. Lb. 30 cts., 5 lbs. \$1.50, 10 lbs. \$2.75, bus. (20 lbs.) \$5.

Our Special Lawn Fertilizer produces a permanent lawn of rich, luxuriant green

SHADY-SIDE MIXTURE

Usually it is quite difficult to obtain a satisfactory growth of grass under trees and in shady places; for sowing in such places we recommend the use of this Shady-Side Mixture. It will produce quickly an abundant and even growth of beautiful green grass. The grasses used in making this special mixture are only those that are well adapted to growing in the shade. Lb. 40 cts., 5 lbs. \$2, 10 lbs. \$3.75, bus. (20 lbs.) \$7.

GOLF-LINK MIXTURE

This mixture is composed of grasses best suited for golf-links, and is the result of careful experiments, as well as careful watching for several years of practical results on golf-links sown with our grass seeds. By the use of this mixture, and with proper care and attention, the finest links can be rivaled. Lb. 35 c., 5 lbs. \$1.75, 10 lbs. \$3.25, bus. (20 lbs.) \$6.

PUTTING-GREEN MIXTURE

The hardiest and finest low-growing grasses are contained in this mixture. It produces a beautiful and lasting turf calculated to withstand hard wear. Lb. 50c., 5 lbs. \$2.50, 10 lbs. \$4.25, bus. (20 lbs.) \$8.

TERRACE MIXTURE

A special mixture of grasses for sowing on terraces and hillsides, producing spreading roots, thus preventing heavy rains from washing out. It will withstand drought and exposure, and thrive on shallow soils, and at the same time produce a rich green lawn throughout the season. Lb. 35 cts., 5 lbs. \$1.75, 10 lbs. \$3.25, bus. (20 lbs.) \$6.

WHITE CLOVER

The best variety for lawns, as it forms a close herbage and remains green throughout the season. It is also valuable when mixed with grass seed for pasture. Sow in spring at the rate of six pounds to the acre when sown alone; half the quantity when sown with other grasses. ½ lb. 35 cts., lb. 65 cts., 5 Ibs. \$3.25.

KENTUCKY BLUE GRASS

This is rated as the finest permanent pasture grass. Especially suited to meadows and rich lands. It is the grass of the famous and fertile limestone soils of Kentucky, and is no less a favorite all through the northern states. A perfect lawn grass. Lb. 30c., 5 lbs. \$1.50, 10 lbs. \$2.75, bus. (20 lbs.) \$5.

SPECIAL LAWN FERTILIZER

If the lawn is in fair condition, rake off the dead grass and leaves in the early spring, and scatter broadcast over the surface, then wet it down thoroughly so that the strength is carried to the roots of the grass. The first application should be made early in spring, as soon as frost is out of the ground, at the rate of 25 lbs. to 1,000 square feet. 10 lbs. 75 cts., 50 lbs. \$2, 100 lbs. \$3.50, 200 lbs. \$6.50, 500 lbs. \$15.

Bone Meal. One of the best fertilizers known. As a lawn dressing it is unsurpassed. Should be applied at the rate of one pound to fifty square feet of lawn. Very lasting in its effect. 10 lbs. 75 cts., 50 lbs. \$2, 100 lbs. \$3.50.

Nitrate of Soda. Not a substitute for other manures, but we recommend it as the cheapest and best form in which to apply nitrogen to plants, producing a very quick growth. 10 lbs. \$1.25, 25 lbs. \$2.50, 100 lbs. \$8.

Hard-wood Ashes. One of the best lawn fertilizers; contains a large amount of potash. Apply in the late fall or early spring, 1,000 to 1,500 pounds to the acre. 10 lbs. 50 cts., 50 lbs. \$1.75, 100 lbs. \$3.
SHEEP MANURE, Pulverized. A pure natural manure, excellent for lawn or garden. Apply in fall or spring. Also excellent for potting. 10 lbs. 60 cts., 50 lbs. \$1.25, 100 lbs. \$2.25, 1,000 lbs. \$20.
Plant Food. H. & O. Brand especially prepared for house-plants and the home garden. Odorless and

sanitary. Box 25 cts.

Concrete Pergolas are most impressive and lasting

PERGOLAS

The Pergola forms such an admirable covering for a favorite walk that its popularity is readily accounted for. Its very character suggests vines that will contribute to the picturesque and overcome the natural stiffness and uniformity.

The construction of Pergolas must conform to the building, and they vary in cost. The wooden post-and-beam effect costs from \$5 to \$10 per foot. We shall be pleased to submit designs for any style of Pergola.

TOOLS FOR LAWN AND GARDEN

Our long experience has convinced us that the quality and practicability of the Lawn and Garden Tools we recommend are the essentials of making gardening a pleasure. Our stock contains tools and equipment of all descriptions that simplify the work of the garden. As to quality, we have only the best. We select only the highest grades of the various tools, which makes our assortment complete and the standard of quality the best.

PHILADELPHIA LAWN TRIMMER

The Philadelphia Lawn Trimmer has all the excellent qualities of the Philadelphia Lawn Mower. It has but one drive wheel, and is specially adapted for mowing close to the edge of sidewalks and fences, around trees or in corners where it is impossible to reach with a mower. \$8.50 each.

HANDY LAWN TRIMMER

Operates on the lawn-mower principle; equipped with gearing which runs knives when the machine is in motion. Trims close to the edges of walks, flower-beds, fences, etc. \$3.50 each.

GENUINE PHILADELPHIA LAWN MOWERS

We recommend them as the best Mowers made. Style A, High Wheel. Constructed of fine steel throughout. The mechanism is so arranged as to make it very easy-running. Has 10-inch drive wheels, cylinder has four blades; diameter of cylinder 6½ inches; train of three gears and double ratchet, making both wheels drivers. For durability it is unsurpassed.

HOSE ACCESSORIES

No. 62, Perfect Clincher Couplings. All brass; will not pull off. 34-inch. 30 cts. per set.

No. 63, Perfect Clincher Mender. Easily and quickly adjusted. Brass tube and galvanized clamps. ¾-inch. 10 cts. each, \$1 per doz.

No. 64, Sure-on Mender. A brass Mender that perfectly mends the hose. 15 cts. each.

DETACHABLE HOSE REEL, No. 65 A. The handiest and most compact outfit of its kind. The hose is quickly rolled up; loosen the thumb-screw and slip the reel off the faucet. Attached and detached instantly. \$6 each.

No. 65 B, Extra Faucet. \$1.50 each.

ALL-STEEL HOSE REEL, No. 66. Strongly constructed; easy to push about. \$3.50 each.

No. 67, Speco Hose Reel. Especially designed for use on large lawns. It will easily carry 200 feet of 34-inch hose. Any desired length of hose may be pulled off. \$10 each.

HOSE NOZZLES

No. 68, Magic Nozzle. All brass; with shut-off. 85 cts. each.

No. 69, Universal Nozzle. A simple brass Nozzle that gives results. 50 cts. each.

LAWN SPRINKLERS

Something new in the way of a Lawn Sprinkler.

THE FIN DE SIECLE B

This Sprinkler is not set in the center of the lawn you wish to sprinkle, but on the side; therefore you avoid having to wet your feet in changing its location. It also prevents watering the sidewalk, and perhaps the street, and incidentally saves water, as it sprinkles only the desired lawn.

No. 71 BD. Will cover an oblong space, 10 by 40 feet. \$2 each.

No. 71BJ. Will cover an oblong space of 800 square feet, or 20 by 40 feet. \$2 each.

These Sprinklers are constructed of brass, and have been thoroughly tested. They will solve your sprinkling troubles.

LITTLE WONDER, No. 73 A. On base; throws a fine spray. 75 cts. each.

LITTLE WONDER, No. 73 B. With spike to stick in ground. 65 cts. each.

CRESCENT FOUNTAIN, No. 74. Sprinkles to a straight line. No need of turning off water to change its position. Finished in brass; galvanized bottom. 85 cts. each.

FOUNTAIN, No. 75. Sprinkles a square area; finished in brass; galvanized bottom. 75 cts. each.

HANDY, No. 76. The best little Sprinkler. 35 cts. each.

All Lawn and Garden Tools have been carefully selected by us, from a practical viewpoint. We have also considered the advisability of well-made, light, quality tools.

SAINT PAUL, MINN.

SPRAYING

The insect pests are constantly increasing. Hence, it is essential for the home-gardener to be prepared for spraying. "An ounce of prevention is worth a pound of cure." Spraying should be done early in the season and continued throughout the summer. Our Sprayers have been considered from a practical standpoint, and our list of insecticides has been carefully selected. A sprayingchart will be sent on application. By its use you will know when to spray and what to use.

SPRAYERS

No. 150, Auto-Spray No. 1. The strongest and most simple compressed-air Sprayer. Equipped with carrying strap, 2 feet of ½-inch hose, fine spray-nozzle, solid-stream cap, and the auto-pop, which, by operating the lever in the hand, opens and closes the valve, thus directing the spray. The only selfcleaning nozzle. Heavy brass tank. \$10 each.

Auto-Spray No. 1 Attachments:

No. 151, Extension Rods. Solid Brass, 2-foot length 60 cts. each

No. 152, Elbow Extension. Solid Brass. 30c. each. No. 153. Strainer. Solid Brass. \$1.20 each.

No. 158, Auto-Spray. Practical small Sprayer. Will handle all solutions. Can be easily cleaned.

No. 158 A. 1 quart; all tin. \$1 each.

No. 158 B. 1 quart; galvanized tank. \$1.25 each.

No. 158 C. 1 quart; brass tank. \$1.50 each.

No. 159 A. 2 quarts; galvanized tank. \$1.65 each.

No. 159 B. 2 quart; brass tank. \$2 each.

No. 160, Auto-Spray. Double-action, all-brass galvanized knapsack. Adapted for tree spraying, will also work out of a bucket and spray whitewash. Complete with knapsack, \$8. Extension, 60 cts.

No. 162, Erado. Through the perfection of the Erado the old-fashioned laborious and back-breaking method of digging up dandelions is eliminated. The plunger is forced into the heart of the dandelion and sufficient liquid is allowed to drop on the root to destroy it. When filled with Knoxweed, dandling burdely extended to the plunger in the control of the c root to destroy it. When filled with Knoxwed dandelions, burdock, etc., are easily destroyed.

No. 162 A. Galvanized-iron cylinder; brass tip; iron handle. \$1.25 each.

No. 162 B. Solid brass, with iron handle. \$1.75 each.

No. 165, Rubber Plant Sprinklers. Sprinkler for use on your house plants.

No. 165 A. Small size, 90 cts. each.

No. 165 B. Medium size. \$1.25 each.

No. 165 C. Large size. \$1.50 each.

INSECTICIDES AND FUNGICIDES

Arsenate of Lead (Paste). Will destroy all leaf-eating insects. Will not wash off or in any way burn the foliage. 1-lb. can, 40 cts.

Bordeaux Mixture (Dry). For mildew, blight, and fungous diseases. 1-lb. can, 40 cts.

Bordeaux Mixture (Paste) Use 1 pint to 6 gallons of water. 1-pt. can, 30 cts.; 1-qt. can, 65 cts.

Bug and Blight Dust, No. 3. A powder prepared especially for potato-bugs. 2-lb. carton, 60 cts.

Carbon Disulphide. A very effective ant-exterminator. Also for root aphis and all insects infesting the soil. 1-lb. can, 50 cts.

1-Ib. can, 50 cts.

Fish-Oil Soap. An excellent wash for trees and plants where insects affect the bark. 1-lb. carton, 30 cts. Hellebore (Powdered White). For currant worms. 1/4-Ib. carton, 20 cts.; 1/2-Ib. carton, 35 cts.; 1-Ib. carton, 70 cts.

Kerosene Emulsion. For all insects that suck the foliage and stems. 1-pt. can, 30 cts.; 1-qt. can, 45 cts. Lime-Sulphur. For San José and all other scale. Should be used early in the season as a preventive and is valuable as a summer spray for all perennials and fruit trees. 1-pt. can, 25 cts.

H. & O. Nicotine Solution. A powerful Insecticide

H. & O. Nicotine Solution. A powerful Insecticide for plant-lice, aphis, green fly, etc. 1-oz. bottle, 25 cts.; 2-oz. bottle, 50 cts.; 4-oz. bottle, 75 cts.

Tobacco Soap. The best insecticide for house plants during the winter. ½-lb. carton, 20 cts.

Slug-Shot. A powder ready for use, for worms on cabbage, currants, cucumbers, etc. 1-lb. carton, 20c. Mole and Gopher Exterminator. A cartridge of slow action. Use two cartridges; the fumes will quickly kill. 2 cartridges, 30 cts.; 10 for \$1.50.

WEED-KILLERS

A Chemical Weed-exterminator. Saves time and labor and keeps roads, gutters, tennis-courts, and walks in the garden free from all weeds and grass. 1-qt. can, 85 cts.; 1-gal. can, \$3.

Knoxweed. Kills dandelions and other noxious weeds

in the lawn. Does not injure the grass, when properly applied. Can, with dropper, containing enough to treat a medium-sized lawn, 50 cts.; ½-gal. can, \$1.50; 1-gal. can, \$2.50.

Gladioli are flowers for real -day after day you enjoy their unfolding petals and dainty colors

OUALITY GLADIOLI

SE a sandy loam, but if this is not to be had, use soil that is well drained. The soil should be well fertilized with stable manure, plowing or spading the earth in the fall and scattering the manure; in the spring, work the fertilizer into the soil. Other fertilizers are good, but we prefer manure. Planting should be done from May 1 to June 1, making plantings from ten days to two weeks apart, extending the blooming season. Large bulbs should be planted about 6 inches deep, the smaller sizes from 3 to 4 inches deep. We are large growers of Gladioli, and have the best selections to be had, using large quantities of the cut blooms for our select flower trade.

NEW AND RARE SORTS

America. Flesh-pink. Flowers immense, borne on

strong spike. 50 cts. per doz., \$3 per 100.

Attraction. Deep rose, with white throat. 75 cts. per doz., \$5 per 100.

Augusta. White with layender anthers. Strong spike. 50 cts. per doz., \$3 per 100.

Baron Hulot. A deep violet-blue with well-opened

flowers. 75 cts. per doz. \$5 per 100.

Chicago White. White with lavender marking in throat. 10 cts. each, 75 cts. per doz.

Dawn. Beautiful shell-pink. 20 cts. each, \$2

per doz.

Europa. Pure snow-white, large spikes. Considered the best white. 30 cts. each, \$3 per doz.

Empress of India. A rich dark red, rare and beau-Empress of India. A rich dark red, rare and beautiful. One of the best. 20 cts. each, \$2 per doz.

Glory of Holland. A new white with slight tinting of pale pink and anthers of delicate lavender. 15 cts. each, \$1.50 per doz.

Halley. Early blooming. Large well-opened flowers of delicate salmon-pink. 60 cts. per doz., \$4 per 100.

Klondyke. Clear primrose-yellow with crimson blotch. 75 cts. per doz., 85 per 100. Lily Lehman. No white Gladiolus equals this variety. A pure glistening white, with just a tint of pink on tips of petals. 15c. each, \$1.50 per doz. Minnesota. Fine salmon-pink, large blossom; early. 10 cts. each, \$1 per doz.

Mrs. Francis King. The original. Beautiful 'Besnard Shade' flame-pink. Immense flowers on

spike 4 feet high. 50 cts. per doz., \$3 per 100. Niagara. Light crocus-yellow, throat shaded deeper. Large open flowers on a strong spike. One of the best. 15 cts. each, \$1.50 per doz.

Panama. Large wide-open wax-like flowers of glow-

ing mauve-rose. 15 cts. each, \$1.50 per doz.

Peace. Large white flowers; pale violet feathering on lower petals. 15 cts. each, \$1.50 per doz.

Pink Beauty. Rose-pink with dark crimson blotch.

75 cts. per doz., \$5 per 100.

Princeps. The Thousand-Dollar Gladiolus. Amaryllis-like flowers of a rich dark scarlet marked white on lower petals. 15 cts. each, \$1.50 per doz.

Ruffled Glory. Delicate pink with crimson stripe in the center of each lower petal. The wide-open paired flowers all face in the same direction and are borne on stout stalks 3 to 3½ feet high. Petals exquisitely ruffled. 75 cts. per doz., \$5 per 100.

Schwaben. A strong-growing variety, many of the bulbs producing 2 or 3 flowering stalks, each stalk producing 15 to 20 large flowers with 6 to 8 usually

open at one time. Clear canary-yellow, shading to a soft sulphur-yellow. 30 cts. each, \$3 per doz. Willy Wigman. Large, wide open flower. Bloom of a beautiful blush tint, with long bright tulip blotch on lower petals. 15 cts. each, \$1.50 per doz.

GOLD MEDAL MIXTURE

This mixture contains good varieties as well as new hybrids. Shades of pink, scarlet, blood-red, blue, and yellow. 50 cts. per doz., \$4 per 100.

EXTRA-SPECIAL COLLECTION

Twelve varieties of recent introduction and great merit. Some have never been offered before and, if bought separately, would cost \$2. Our price for this collection of twelve varieties, \$1.

RAINBOW COLLECTION

For those who do not care for rare varieties. This collection contains some of every color and shade in Gladioli, and, if bought separately, would cost at least \$1. Our price, 60 cts. per doz.

CLUB MIXTURE

Contains good varieties of all colors. Will give general satisfaction. 40 cts. per doz., \$2.50 per 100.

Careful treatment of a badly decayed trunk

Trees and Their Care

Trees need pruning to keep them healthy; diseased and decayed limbs should be removed before they cause greater damage. Trees need pruning to keep them symmetrical so that their tops may be balanced evenly, thus adding to their beauty.

Trees may be kept shapely and healthy, provided they receive the attention of one who knows their habit, has made a study of tree life, and knows the

treatment they should receive.

Some limbs may have been broken off by the wind or as a result of improper pruning. Decay soon starts here and will continue unless the cavity is properly All decayed and diseased wood must be retreated. An decayed and diseased wood must be removed, the healthy wood treated chemically so that it may be preserved, and the wound kept from "bleeding." Filling the cavity with cement is only the mechanical part—the expert work must be done before this operation is undertaken.

An expert landscape man will never plant a tree with crotch, for he knows it will produce future trouble. This defect is seldom found in trees from a nursery, but rather in trees selected from the woods. Such speci-mens must be saved from splitting by the use of bolts, or bolt and chain, which, if properly placed, will keep

the tree in good condition for years.

Many trees are planted in poor soil, with the result that they become diseased and decayed because the tree has been starved. Fertilizer should now be supplied, in such form that the small roots will gather plant-food and distribute it to the entire tree.

If your trees are not in a healthy condition, write us, giving the details, or make arrangements to have one of

Showing the proper way of adjusting chains

our landscape men, who are on the road most of the time, inspect your trees. One of our men may be in your neighborhood at present, and thus the cost of such an inspection would be slight. We shall be pleased to give you an estimate on the work, charging a stipulated price per day for the man, plus the expenses.

The H. & O. Service assures you perfect satisfaction. We limit our territory so that we may be able to give the best service possible; we grow everything we plant or recommend for planting. Our Service stands for quality. We shall be pleased to refer you to some of our patrons in your neighborhood, or give you any

other references.

THREE PRACTICAL BOOKS

GARDEN GUIDE. This book tells how to plan, plant, and maintain the home grounds; how to grow good vegetables and fruit; how to raise beautiful flowers; how to take care of porch plants, lawns, window boxes. 250 pages, profusely illustrated. Cover in four colors. By mail, paper 30 cts., cloth 75 cts.

Cover in four colors. By mail, paper 30 cts., cloth /3 cts.

MILADY'S HOUSE PLANTS. By F. E. Palmer, a recognized authority. Any woman, with the aid of this book, may have a fine collection of plants to add cheer and beauty to the home during the fall and winter months, then in spring and summer to lend their beauty to the outdoor blanting. Profusely illustrated with 100 instructive pictures. Cover in four colors. By mail, paper 60 cts., cloth \$1.

PRACTICAL LANDSCAPE GARDENING. The result of twenty years' experience. 276 pages, handsome cover in four colors. Cloth \$1.50, by mail, \$1.65.

OTHER USEFUL GARDEN BOOKS

Making a Bulb Garden. By Grace Tabor. Illustrated.

The Small Country Place. By S. T. Maynard. How to make a small country place attractive and comfortable. \$1.50.
The American Flower Garden. By Neltje Blanchan. Popular edition with full-page illustrations. \$1.50.

Our Garden Flowers. By Harriet L. Keeler. 90 full-page illustrations from photographs, and 186 drawings. \$2.

My Growing Garden. By J. Horace McFarland. 12mo. \$2.
Garden Planning. By W. S. Rogers. A guide easily applied to the different conditions facing the gardener. \$1.25.
Manual of Gardening. By L. H. Bailey. Illustrated. 12mo. Cloth \$2.

The Gladiolus. By Matthew Crawford and Dr. Van Fleet. ully illustrated. 120 pages. Cloth \$1.25. Making the Grounds Attractive with Shrubbery. By race Tabor. 50 cts.

Making the Grounds Attractive with Shrubbery. By Grace Tabor. 50 cts.

The Pruning Manual. By L. H. Bailey. New, revised, and rewritten. 12mo. Cloth \$2.

Field Book of American Trees and Shrubs. By F. Schuyler Matthews, Covers the entire territory of the United States. 120 illustrations, 16 in color, and 43 maps. \$2.

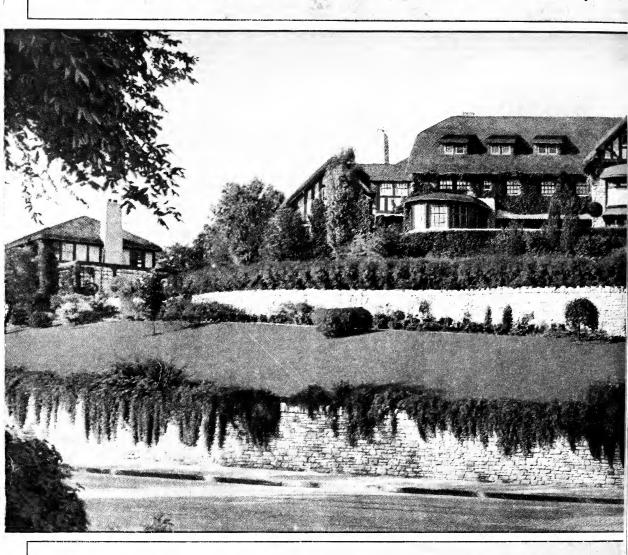

Trees, Shrubs, Vines, and Herbaceous Perennials. By Kirkegard, Fernald, and White. Over 400 pages, 2,096 descriptive classifications. 59 full-page illustrations in tone. \$2.

Principles of Vegetable Gardening. By L. H. Bailey. Illustrated. 12mo. Cloth \$1.50.

Fruits and Vegetables Under Glass. By Wm. Turner. 256 pages. \$3.50.

When ordering any of the above books, to cover packing and postage purchasers will please add to their remittance as follows: 5 cts. on a 50-ct. order; 10 cts. on a \$1 order, 15 cts. on an order for \$1.50 to \$2; 25 cts. on orders up to \$5.

COMPLETE (III) LANDSCAPE SERVICE
